STATE OF WEST VIRGINIA
Purchasing Division
PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

*Projects with Paradigm Architecture

Pat Stinson Construction Management Services

Contract Administration Services

Oversee quality assurance and document interpretation by all vendors and subcontractors.

Coordinate on-site issues and RFIs with the architect and owner in an effort to reduce or eliminate change orders and maintain budget control.

Ensure strict adherence to Safety Program and other life safety requirements.

Develop and coordinate procedures for submittal review and pay requests.

Provide documented weekly safety inspections.

Coordinate testing procedures.

Develop reporting procedures for the contractor, architect and owner's representative.

Provide updated CPM schedule monthly.

Develop and coordinate meeting schedules and agendas.

Goals for Construction Management Services

Work with the owner and architect during the development of the plans and specifications to provide a cost effective project through clear and concise design documents.

Provide a realistic project budget and schedule.

Receive competitive bids.

Reduce coordination issues between owner operations and the construction process.

Assist in the coordination between owner-furnished equipment and bid documents.

Minimize change orders and bid addenda.

Preconstruction Services

Represent the owner in reviewing drawings and specifications throughout design development.

Attend design development review meetings with architect and owner so as to ensure an understanding of the coordination requirements associated with the architectural design elements and construction activities.

Incorporate construction requirements into the bid documents, such as:

- Phasing Requirements
- Material Staging Areas
- Parking Areas for Construction Employees
- Life Safety Issues
- Utility Consumption

Provide detailed initial cost estimates and updates based upon design stages.

Evaluate alternate construction details, systems, and materials as required, i.e., value engineering.

Develop a CPM construction schedule incorporating the required construction phases. This includes design development scheduling.

Clarify bid documents to ensure all contractors understand administrative as well as construction requirements.

Permits

Applicable Sales Taxes

Time of Bid

Unit Prices

Insurance requirements—Builder's Risk; OCP

Scheduling Requirements

Local and State Taxes

Pre-Bid Meetings

Alternate Bids

Liquidated Damages

Testing Procedures

Minimize bid addenda thus reducing bid delays, future change orders, and construction delays.

Assist in coordination of responses to prospective bidders during the bid process.

Assist with review of final bids.

HIGHLIGHTED EXPERIENCE

THE CHILDREN'S HOSPITAL AT MIDTOWN MEDICAL CENTER
Columbus Regional Health - Columbus, GA

UAB MEDICINE MULTISPECIALTY CLINIC
Baptist Medical Center South - Montgomery, AL

MONTGOMERY CANCER CENTER
Montgomery, AL

UAB SCHOOL OF MEDICINE
Baptist Medical Center South - Montgomery, AL

WORK EXPERIENCE

Columbus Regional Health

- The Children's Hospital at Midtown Medical Center, Columbus, GA - 20,553 SF
This project involved substantial renovation of the 5th floor for the purpose of upgrading the facilities for Women's and Children's Services. The renovations were staged appropriately to insure minimal patient disruption, maintain infection control procedures, and preserve interim life safety measures.
- Columbus Hospice at Doctors Specialty Hospital, Columbus, GA

Baptist Medical Center South

- UAB Medicine Multispecialty Clinic, Montgomery, AL - 20,991 SF
Baptist Health has partnered with the UAB Health System to open the UAB Medicine Multispecialty Clinic at Baptist Medical Center South. The clinic offers four much-needed specialties, including urology, gastroenterology, endocrinology and rheumatology.
- UAB School of Medicine, Montgomery, AL - 5,500 SF
This renovation merged progressive design with academic tradition to complement and enhance the total educational environment.
- Baptist South Cafeteria Renovation, Montgomery, AL - 5,605 SF

Montgomery Cancer Center

- Montgomery Cancer Center Lobby Renovation, Montgomery, AL - 2,803 SF
Montgomery Cancer Center's Lobby was is a special place for healing. The Lobby was renovated to reflect the advanced, modern cancer care provided in a physician office setting. For added convenience and comfort, The Healing Cup offers premium coffee, baked goods, grab-and-go sandwiches and salads in a casual café atmosphere.

Additional Projects

- Southern Orthopaedic Surgeons - Baptist Health System, Montgomery, AL
- Baptist East Post Partum Bed Wing - Baptist Health System, Montgomery, AL

Ainsley is a Senior Project Designer at Design Innovations, Inc. whose past experience includes extensive work in healthcare environments. Ainsley brings a hands-on work ethic to each project by becoming involved with all aspects of the building's design, starting with planning and continuing through to construction.

HIGHLIGHTED EXPERIENCE

UAB BLAZERS MEN'S BASKETBALL LOCKER ROOMS
The University of Alabama at Birmingham - Birmingham, AL

PETERSON HOUSE
University of Montevallo - Montevallo, AL

MADISON HOSPITAL
Huntsville Hospital - Madison, AL

FREESTANDING EMERGENCY DEPARTMENT
UAB Medical West - Hoover, AL

WORK EXPERIENCE

The University of Alabama at Birmingham

- UAB Blazers Men's Basketball Locker Room, Birmingham, AL - \$550,000 / 2,246 SF
Renovations to the existing locker room facility include many state-of-the-art technology upgrades to attract recruits, include larger lockers, touch screen TVs, updated restroom and shower areas, a new lounge area with theater seating, gaming area, and refreshment bar, as well as Coaches' locker room upgrades.

University of Montevallo

- Peterson House Renovation, Montevallo, AL - 3,500 SF
The Peterson House is part of the University of Montevallo Historic District, listed on the National Register of Historic Places. The renovation includes updating the two-story residence into administrative office spaces, including reroofing, façade repairs, and restoration of character details.

UAB Medical West

- Freestanding Emergency Department, Hoover, AL - \$13.5 Million / 24,342 SF
Alabama's first freestanding emergency department consists of 10 exam rooms, 2 trauma rooms, CT, x-ray, general and vascular ultrasound, EKG, laboratory, and room for expansion.

Huntsville Hospital

- Madison Hospital, Madison, AL - \$54.5 Million / 228,000 SF
The first new non-replacement hospital to be built in Alabama since the 1970's. The hospital's design was developed with input from local officials so that leading edge technology could be combined with the traditional Southern elements in such a way that would feel comfortable to the patients and community.

State of West Virginia

- Cacapon State Park Lodge Expansion, Berkeley Springs, WV - 60,650 SF
This resort mountain lodge was designed through 75% completion by Design Innovations from 2009 to 2012. The majority of the design process was completed when the project was placed on hold in early 2013.

2.1 d.

Descriptions of Past Projects Completed – Fire Alarm

Pipestem McKeever Lodge

Pipestem, WV

Services Provided:

- Electrical
- Fire Alarm

Construction Amount: \$225k

Facility Area: 63,000 ft²

**Owner: West Virginia Division of
Natural Resources**

Status: Complete

The fire alarm at McKeever Lodge at Pipestem State Park was obsolete and having operational issues, particularly in the original lodge portion. Miller Engineering designed a complete fire alarm replacement of the lodge side, while interfacing with the conference center portion of the lodge, which had a more up to date fire alarm system. Previously, the lodge and conference systems operated separately, and MEI designed the systems to interface and monitor the lodge as one facility. The system was designed to interface with the conference side elevators, mechanical equipment, and kitchen hoods. Provisions for expansion were made for future upgrades to the lodge elevators. The lodge remained in operation during the entire replacement, with both the contractor and MEI coordinating with the DNR to minimize the amount of rooms taken out of service.

Project Contact:
Carolyn Mansberger, Project Manager
State Parks Section
(304) 558-2764

Descriptions of Past Projects Completed – HVAC Piping

Pipestem McKeever Lodge

Pipestem, WV

Services Provided:

- HVAC
- Plumbing
- Electrical
- Accommodation of Existing Systems

Estimated Budget: \$1.7M

Facility Area: 63,000 ft²

Owner: West Virginia Division of Natural Resources

The original HVAC piping at McKeever Lodge had exceeded its lifespan and had been suffering from corrosion leading to multiple leaks, including one causing an electrical service outage. Miller Engineering was hired to investigate the existing piping, discovering all of the piping required replacement. As this lodge is regularly occupied for larger conferences, the project had to be phased to minimize the amount of guest rooms taken out of service at one time. MEI also designed provisions to interconnect the lodge's two separate boiler/chiller plants so one plant could operate the entire lodge at a partial capacity while the other plant was replaced and re-piped. This interconnect also allows the lodge to operate in the event of a boiler or chiller outage. Power was provided to new equipment, and motor control centers were added to control the building loop pumps. A new building controls system was installed to allow the plants to run at optimum efficiency while meeting the lodges heating and cooling needs.

Project Contact:
Carolyn Mansberger, Project Manager
State Parks Section
(304) 558-2764

Descriptions of Past Projects Completed – MEP

Cacapon Old Inn

Berkeley Springs, WV

Services Provided:

- HVAC
- Plumbing
- Electrical

MEP Budget: \$98k

Facility Area: 5,500 ft²

**Owner: West Virginia Division of
Natural Resources**

The Old Inn at Cacapon State Park is a popular lodging choice for large gatherings at the park. The Old Inn only had window AC and heating only through fire places. MEI designed a complete HVAC renovation which includes propane fired furnaces with DX air conditioning to serve the first floor common areas. The guest rooms on the second floor utilize mini-split system units, allowing for individual room control. The kitchen area was completely renovated including new appliances making it more useful for large gatherings.

The HVAC renovation required architectural and structural modifications to the facility. The guest rooms were updated with new furniture and bathrooms were undated as well. Great detail was taken to keep any modifications in-line with the historical component of the Old Inn.

Project Contact:
Debbie Demyan, Project Engineer
State Parks Section
(304) 550-4892

Descriptions of Past Projects Completed – Misc. Upgrades

Blackwater Falls State Park Lodge Upgrades

Davis, WV

Services Provided:

- General Trades
- Plumbing
- Electrical
- Mechanical
- Pool

Estimated Budget: \$1.1 Mil

Facility Area: 46,000 ft²

**Owner: West Virginia Division of
Natural Resources**

MEI has performed several projects at the Blackwater Falls State Park Lodge that cover many trades. Miller Engineering designed new HVAC systems for the dining room and make up unit for the Kitchen. The units were installed in a manner to not interfere with views of the park. The second floor plumbing piping was upgraded and routed out of the attic for freeze protection. The bathrooms were re-connected with new GFCI receptacles to eliminate nuisance tripping. New panel boards, hallway lighting, and hallway ceilings were installed as well. A MEI project which was just completed is the replacement and re-piping of the hot tub. The existing spa was leaking and had maintenance issues. A new hot tub was installed along with tiling. A new chemical and pump room was installed as well. Miller Engineering was recently contracted to design the replacement of the existing boiler system and convert them from steam to hot water. The project is currently in design and will include the construction of a boiler room.

Project Contact:

**Bradley S. Leslie, PE, Assistant Chief
State Parks Section

Travis Taylor, PE

Experience in project management facilitates Travis’s ability to create and design constructible projects. Prior to joining the Miller Engineering team he was directly responsible for managing \$10 million in electrical construction budgets. His experiences encompass both new construction and renovation. Travis maintains professional competencies by attending seminars and continuing education classes. As lead engineer he provides HVAC, mechanical, plumbing and electrical design solutions and services for our clients. In addition, he is part of our team’s complete assessment process in both

planning and MEP design through construction administration.

Project Role: Lead MEP Engineer

- *Design of Mechanical, Electrical, and Plumbing Systems*
- *Building Information Modeling - Revit*
- *Constructible Materials Evaluation*
- *Site Evaluation and Mechanical System Review*
- *Submittal and RFP Review*
- *RFI Coordination, Review, and Response*
- *Construction Observation*

Firm Profile

MILLER ENGINEERING is a solely held (S) corporation owned by Craig Miller PE, President. The corporation maintains a Certificate of Authority with the WV State PE Board and has carried professional liability insurance since its inception. Neither the firm nor its professional engineers have ever faced disciplinary action in any form from the states in which they are registered.

Our engineered solutions involve a detailed assessment process: investigation, observation, communication with stakeholders, system analysis, building modeling and engagement from our entire team. We approach each and every project with this process and the guiding principle that buildings are designed to be livable and function in their intended purpose.

Over the past 13 years Miller Engineering, Inc. (MEI) has engineered solutions for over \$17.2M in MEP system upgrades, repairs and renovations for projects of all scopes and sizes, with clients ranging from private owners to local and state governments. With a strict attention to detail and commitment to delivering a job done well and done right the first time, every time, MEI has accumulated a change order percentage of less than 0.1% over the past 8 years.

Our team has unique skill-sets regarding engineered renovation solutions. Each member of the team has hands-on mechanical system experience including installation, construction, design and maintenance.

*Miller Engineering takes pride in being **different by design**, and that difference shines through in all phases of our work and continued relationships with our clients.*

- **Experienced and Licensed Professional Engineers**
- **Quality, Value-Engineered Project Delivery**
- **Qualified Construction Representative on Staff**

COMPANY HISTORY

ENGINEERING FOR
STRUCTURAL SYSTEMS
MECHANICAL SYSTEMS
ELECTRICAL SYSTEMS
FORENSIC INVESTIGATION

Overview

Allegheny Design Services (ADS) is a consulting engineering firm specializing in structural and MEP building design and building analysis. Dedicated to serving West Virginia and the surrounding region, ADS recognizes the need for reliable and full service engineering support. ADS provides all phases necessary for the successful completion of a building project including schematic design studies, design development, construction documents and specifications, and construction administration.

ADS' experience in Design and Project Management includes:

- Commercial Facilities
- Industrial Facilities
- Institutional Facilities
- Educational Facilities

ADS was established by David Simpson, PE, MBA, in 2002 as a result of a need in North Central West Virginia for reliable structural engineering services. In 2009 MEP engineering services were added, led by Mike Chancey, PE. ADS utilizes a combination of office technology and a motivated staff to deliver projects typically up to \$40 million in construction value. Our clients include architects, contractors, developers, attorneys and insurance companies.

ADS currently utilizes the latest engineering design and BIM software for the development of project work.

Value Added Services

Our company strives to provide efficient, quality engineering services that serve both the needs of the client as well as the needs of the design team. We achieve this level of service by leveraging our extensive project experience with a workflow built upon the cohesive integration of 3D Revit modeling and the latest analysis software. This integration allows us to produce the highest quality designs in the timeframe needed for successful design-build projects. Our staff is comprised of multiple licensed Professional Engineers.

Allegheny Design - Structural

3.1.d.

Step 3

With the award of the construction contract, we will work with the contractor to establish a number of practices to make the project efficient.

- a. Establish a regular schedule for on-site meetings at two-week or bi-monthly intervals.
- b. Determine process for shop drawing submittals: Newforma, Procore, or other.
- c. Determine process for Request for Information submittals.
- d. Establish Pay Application review and approval process.
- e. Identify a communication process to assure smooth operation of the existing lodge.

We understand that prompt action on the part of the design team and Owner is critical to steady progress by the Contractor. To that end, we strive to provide quick review of shop drawings and Requests for Information. We also want Owners to be aware of issues that require their action. It is also imperative that the Contractor produce a project schedule with critical path items and that the schedule be reviewed and updated at every project meeting. Accountability for recovery in the schedule must be maintained.

The Canaan Resort was an example of scheduling to deliver a project under challenging circumstances. Due to the extreme winter weather conditions, the project was ultimately separated into three bid packages. Early demolition of an old lodging building cleared the way for new construction. The second phase completed the grading, foundations, and structural steel prior to the harsh winter. This allowed the remaining construction documents to be completed, bid, and awarded for early Spring construction. With the steel in place, the construction moved quickly and the new additions were under roof prior to the next winter season.

Many of our recent projects have had completion dates that had to be maintained under any circumstance. Most of these were university student housing projects that involved leases established by the Fall Semester calendar. Under these circumstances, the projects had to be ready for occupancy or there would be significant financial hardship for the Owner. We have been able to successfully deliver these projects which include College Park (\$32M), University Park (\$75M) and UClub Sunnyside (\$35M).

Morgantown Waterfront Development

2.1 c. Project Construction Period Plan

Establishing a Project Schedule

Using the Program and Budget, we will determine the Project Schedule. This will include the timeframe for the completion the drawings and specifications as well as the projected Bidding period. Included in the process will be the submittal to the West Virginia State Fire Marshal's office for plans review and the State Historic Preservation Office if necessary. Finally, we will include the projected construction schedule with dates for Substantial and Final Completion.

Step 1

Meeting a schedule for construction begins with identifying a completion date for drawings and specifications. Upon completion of the construction documents, adequate time is needed to provide the final estimate prior to bidding. Time for meetings to review and approve these estimates must be allocated as well as submittal to the West Virginia State Fire Marshal's office and if necessary the State Historic Preservation Office. There should also be some contingency in the schedule for any changes or modifications based on cost or program changes. Discussion must include winter weather impact on overall schedule and liquidated damages.

Step 2

We will work with the timeframe identified by the West Virginia Purchasing Division for the bidding process. Advertisement of bids, mandatory pre-bid meeting, deadline for questions, issuance of Addenda, receipt of bids, review and award must be determined. We recommend that a contingency of time be budgeted to accommodate any unforeseen issues that arise during the bidding. Finally, there must be time scheduled for award of the contract by the State.

Project Construction History & Plan

3.1.c.

Pillar Innovations

Using internal cost data, and national databases, we are able to provide the Owner rough order of magnitude and schematic cost estimating for initial project development. We often conduct feasibility studies for clients to help them with initial project evaluations. We feel that utilizing the services of a cost estimator is extremely beneficial to the design process and helps keep the project moving in the right direction.

We have included the services of Pat Stinson to perform cost estimating services. Please see this resume for his long, successful career in the construction industry. We typically request detailed cost estimates at each major phase of the design process. If budget overrun are identified, Mr. Stinson has been extremely helpful to price out alternative materials or solutions which help the design team meet budget and time limitations while maintaining the design objectives. At a point near the end of construction documents, we will direct our Cost Estimator to prepare a final estimate based on the final documents including any Alternates. Ideally, there are no surprises and, with the review of this budget, the Owner can direct the bidding of the project. In the event that changes are required, the design team will promptly make the modifications in order to maintain the schedule.

Following the Bidding Phase, we will review the contractor bids as compared to the cost estimate to evaluate the accuracy of the estimate. As the project proceeds through construction, we may utilize the cost estimator as a consultant for any change orders.

Marina Tower and Upper Monongahela River Center

2.1 b. Project Budget Plan

Paradigm Architecture understands the importance of the project budget and takes great pride in being able to meet these budgets. Project budget is not just the construction budget. We assist the owner in reviewing all aspects of the total project budget, including pre-design services, such as surveys, field investigations and geotechnical explorations, furniture, fixtures, and equipment (FFE) packages, and project closeout. Due to our vast experience with multiple project delivery types, including design-build and construction management, we have firsthand experience with monitoring costs throughout the entire project. In our 19 years of operations, we have never had an Owner “reject all bids” due to cost overruns. Many times, to help control costs on the project, we will work with the Owner early on to establish a base bid package that will deliver within budget. We will then establish a series of alternate packages that can be selected from once bids are received. We will also work with the Owner to establish an Owner’s contingency allowance for those unforeseen issues that may arise.

Fairmont State University Hardway Hall

3.1 a. Owner Communication

We understand that communication is fundamental to a successful client relationship and project. We feel that over the years we have worked hard at exercising clear communication skills and it has translated into repeat work with many clients. A record repeat clients is included with this submittal. The following steps and tools are identified to as the means by which we plan to maintain clear communication with the West Virginia Division of Natural Resources (DNR).

Communication at the Highest Level

Paul A. Walker, AIA, NCARB, serves as Principal-in-Charge of all projects in the firm. He understands the requirements of the project and is committed to a successful completion. Paul is available at any time to address issues or answer questions related to any aspect of the project from design through construction. This is the policy we practiced during the Canaan project and are committed to the same at Blackwater Falls. We will also identify a Project Manager who will be continually active on the project and equally able to respond to concerns. This applies to our engineering consultants as well.

Regular Meetings

We have determined that regular meetings are critical to keeping communication fresh and maintaining accountability. We would propose meeting at two-week intervals. This applies to design and construction.

Utilize Tools of Technology

Tools of Technology offer opportunities to provide clarity and access to project information and thereby improve communication. We have utilized Building Information Modeling for nearly a decade. This project documentation software also provides easy generation of 3D images to help communicate design intent. We use Sketch-Up Software for design studies. This program also yields informative images. Project Management software such as Procore or Newforma are becoming common in the industry and we routinely use these on projects. All of these tools have the potential to improve communication but often the best is simply picking up the telephone. We use this as well.

Paradigm Architecture is committed to serving the West Virginia Division of Natural Resources and clearly communicating all aspects of the work during all phases of the project.

Renovation & Upfit Experience

Paradigm Architecture has a solid history of renovation projects (180+), many of which have been for repetitive clients. Our clients can testify to our attention to detail and successful project management on their renovations, most of which have required the existing facilities to remain operational during construction. Our approach to renovations work typically involves an initial assessment of the existing facility, identifying critical needs, operational issues, life safety, potential environmental concerns, and infrastructure requirements. Next we will assist the client in conducting a feasibility study. Our feasibility studies will include cost estimating and phased planning scenarios for construction sequencing.

Overall Experience & Depth of Resources

Paradigm Architecture and our design team is experienced and prepared to commit the resources of our organization to the success of the Blackwater Falls State Park Lodge Renovations project.

Our Experience:

More than **180** renovation and upfit projects over the past **20** years most of which have required the existing facilities to remain operational during construction. See the following Renovation & Upfit Experience project list.

Space Planning

West Virginia University Administrative Services, One Waterfront Place. Programming and design for eight major departments occupying more than 100,000 SF.

Complex Scheduling

Canaan State Park Lodge & Conference Center, Davis, WV. The lodge facility at Canaan Resort State Park was comprised of five 1970s modular lodging buildings and a Main Lodge structure housing the public amenities. When Paradigm Architecture was hired, several challenges were apparent. At least two old lodging buildings were in conflict with the desired additions and would have to be demolished. Furthermore, it would be impossible to complete new construction work prior to the onset of Canaan Valley's notoriously brutal winter. This meant months of idleness for the project. Working closely with the State of West Virginia DNR, we devised a plan to fast track two packages, one for demolition of the two lodging buildings and a foundation and structural steel package. Full construction documents for completion of the project would be bid during the winter months allowing the contractors to begin work in early spring. This decision would result in modest additional costs to the project but speed the opening up by almost a full year. The final facility added 100,000 SF of new construction to 60,000 SF existing Lodge and a construction cost of \$27,600,000.00. See Project Information Sheet included in this proposal.

Canaan Resort represents a highly complex challenge of existing conditions documentation, scheduling, and budget management. Our efforts resulted in another similar project at the Cacapon Resort State Park Lodge & Conference Center.

Resources:

While technology contributes to efficiency and accuracy in production, we believe that the primary resource for a successful project are the individuals assigned to the work. Our team has a long history of projects completed on time and under budget.

Paradigm Architecture's commitment to staffing:

Principal level Relationship Manager, Paul A. Walker, AIA, NCARB

Registered Architects at key levels:

Todd Christopher, AIA, NCARB, Project Architect

David H. Snider, AIA Quality Control, Specifications

Tyler B. Etris, AIA, NCARB, Design, Production, Interiors

Support Staff for production average 15 years of experience each.

Our Consultants' commitment to staffing this project is equally strong. Please reference the Consultants for the full Staff Descriptions.

Budget:

Paradigm Architecture understands the importance of the project budget and takes great pride in being able to meet these budgets. Project budget is not just the construction budget. With Pat Stinson's expertise, we will assist the owner in reviewing all aspects of the total project budget. Due to our vast experience with multiple project delivery types, including design-build and construction management, we have firsthand experience with monitoring costs throughout the entire project. Many times, to help control costs on the project, we will work with the Owner early on to establish a base bid package that will deliver within budget. We will then establish a series of alternate packages that can be selected from once bids are received. We will also work with the Owner to establish an Owner's contingency allowance for those unforeseen issues that may arise.

Fairmont State University Falcon Center

Existing Facilities Renovations

Renovations within existing facilities can be challenging, especially a facility that is occupied during construction. A thorough review of existing conditions is required for the area of the proposed work but also for occupied floors above and below the Work. Record drawing files should be updated, so the design and construction teams have accurate information to make the best decisions throughout the process. Field work documentation should include:

- Meeting with Owner to review any ongoing problems with the facility.
- Field verifications of record drawings; include engineering systems.
- Determine and discuss with Owner required building exits and general discussion regarding location of noise/dust partitions.
- If the proposed work is not located on an exterior wall, review options with Owner; how the Contractor should maintain negative air pressure in the work site?
- Document existing fire-rating methods for structure, including partition rating at fire exits or any specialty rooms that require fire-rated partitions. Locate fire extinguishers and if new work will require additional extinguishers.
- Review construction access to the site and building. Possible staging sites, if any. Other concerns might include, construction parking limitations and material deliveries.
- Document Owner-occupied areas and review times areas will be occupied.
- Review proposed changes to plumbing, mechanical and electrical system determine impact to owner occupied spaces. For example, plumbing changes might require work above finished ceiling of an Owner-occupied space below or above the proposed renovation.
- Review hazardous material such as asbestos, lead paints, etc.
- As the design develops, phasing drawings can be a useful tool to determine the best strategies to complete the project on time and in budget.

Projects Goals & Objectives & Solutions

Morgantown Event Center

Goals & Objectives: Funded through monies provided by a West Virginia Economic Development Grant, Tax Increment Financing, and private investment, the Event Center and Garage is intended to provide a multi-purpose facility to accommodate a variety of activities ranging from banquets, concerts, conventions, lectures, to boxing and other sporting events. The facility will house the West Virginia Public Theater, a summer stock musical theater group. The space must provide full audiovisual, theatrical lighting, stage and rigging as well as portable seating risers to facilitate performing arts.

The property for the project physically connects to the existing Two Waterfront Place Conference Center in the Waterfront District of Morgantown. It is situated adjacent to the Caperton Rail Trail and the Monongahela River. The slope across the site requires that the building be two stories at the river elevation and one level at the road side.

Solution: The design solution positioned common lobby spaces on the upper and lower floors immediately adjacent to the existing Conference Center. Vertical circulation via a grand staircase and elevators provide access to the 23,000 SF event space. The garage is positioned on the end of the development and a concourse provides patrons and visitors direct access to the Event Center and Hotel. Outdoor terraces on the upper and lower levels provide gathering areas to view the river. Back of house areas connect directly to the main event space and include the commercial kitchen, service corridors, storage and loading docks. A "Green Room" with private kitchen for use by performers is also provided. A decorative grid ceiling provides visual interest and allows for access to a sophisticated system of hoists for truss rigging, speaker clusters, lighting positions, and smoke management. The flexibility of the building infrastructure will accommodate banquets to boxing and is specially configured for the performing arts function required by the West Virginia Public Theater.

U Club Sunnyside

Goals & Objectives: Efficiently utilize a topographically-challenging but ideally-positioned property to develop a housing complex for the largest developer of student housing in the country. Provide study, recreational, and fitness opportunities in a common community center and create a strong pedestrian connection to the downtown campus of West Virginia University.

Solution: Multiple buildings housing 575 students were positioned on the site to accommodate the sloping terrain. To solve the pedestrian connection to campus, the Community Center was located at the corner of the site and serves as the vertical circulation path from the housing to the campus. The Center provides opportunities for residents to meet in study rooms, play video games or pool in the lounge, work out in the Fitness Room, or enjoy the outdoor swimming pool.

University Park

Goals & Objectives: Replace aging student housing with 408 apartments in a mixed use development. The housing options are dormitory style double rooms with spa restroom facilities and one, two and four bedroom apartments. Support facilities include University operated food services, private restaurants, a private fitness center, convenience store, a nail salon, study rooms, and community social spaces.

Solution: The final complex includes 6 buildings positioned to create a common courtyard which facilitates outdoor recreational and social activities. Two 9-story towers joined by a common lobby building accommodate 902 freshman students. The three remaining apartment buildings house upperclassmen in 4-story structures. The mixed-use building features retail spaces over 3 floors of apartments. The complex is in walking distance to the Evansdale campus, Ruby Memorial Hospital, and Mylan Puskar Stadium.

Waterfront Marina & Boathouse Bistro

Goals & Objectives: Utilizing a narrow strip of land between the Rail Trail and the Monongalia River, develop a marina and boathouse to provide additional opportunities for the community to participate in activities connected with the river. Provide facilities to house the WVU Rowing Team and local rowing clubs. Finally, allow for space to house a fine dining restaurant which will allow patrons to enjoy the river view.

Solution: The design features a long narrow building in response to the site. Gently sloping ramps provide easy access from the rail trail to the dock slips and crew boat launch. The two story building provides space for boat storage on the lower floor. The restaurant on the upper floor offers dining in a space that features exposed steel bowstring trusses and wood decking reminiscent of a boat hull. An outdoor deck that runs the full length of the building provides outdoor dining overlooking the river. A common outdoor viewing deck allows the public to enjoy the view of the river.

Projects Goals & Objectives & Solutions

Waterfront Marriott Renovations

Goals & Objectives: After the purchase of the Waterfront Place Hotel, the new Owner sought to upgrade the facility to become a full service Marriott Hotel and Conference Center. For Marriott, this was an opportunity to incorporate its new design approach to attract a younger market.

Solution: In Phase 1 of renovations to the facility, all guest room floors and hotel public spaces received upgrades. Rooms feature LVT wood flooring, lounging furniture, photo mural headboards, and clean modern bathrooms with showers. The main lobby space includes a Starbucks, lobby bar and Bourbon Prime Restaurant. Key to this space is the open, contemporary design that invites interaction among visitors. Additional amenities include renovated indoor swimming pool, spa, fitness center, Marriott Rewards Club and outdoor terrace overlooking the Monongalia River. Future renovations will upgrade the Conference Center and the 20,000 SF Event Center.

Two Waterfront Place Hotel & Conference Center

Goals & Objectives: Develop a first class, full service hotel and conference center which would include private condominiums to serve the growing demands of the Morgantown community and West Virginia University. The building represented Phase 2 of a development that included an Administrative Office building and parking garage.

Solution: Positioned on the Monongalia River, the solution included a 17-story tower housing the hotel functions and condominiums. Amenities included a lobby, restaurant, private dining, lobby bar, swimming pool, fitness center and spa. The adjacent 22,000 SF Conference Center includes a 8,000 SF Grand Ballroom, numerous meeting rooms, a Board Room for executive meetings and an outdoor terrace overlooking the river.

Glade Springs Resort & Conference Center

Goals & Objectives: Create a new hotel and conference center addition to complement the existing conference center/restaurant. The new facility should reflect the traditional architecture of the development.

Solution: In keeping with the architecture of the Golf Clubhouse, the new hotel and conference center is positioned in front of the existing facility and utilizes the existing meeting rooms, restaurant and commercial kitchen while providing 48 new guest rooms, lobby, offices and a Grand Ballroom.

Canaan Valley Resort State Park Renovations & Additions

Goals & Objectives: Replace outdated lodging with modern guest rooms and common area upgrades which highlight the beauty of the Canaan Valley.

Solution: Two guest lodging wings flank a new lobby in order to maximize the views of the valley. The existing lodge public spaces were repurposed to include a snack bar, gift shop, Pre-function area and meeting rooms.

Cacapon Resort State Park Lodge Expansion

Goals & Objectives: Enhance guest experience by providing additional quality lodging, meeting and recreational opportunities. Upgrade aging utility systems to assure long term operation of the park.

Solution: By master planning the entire complex and creating an addition that fulfils the functional goals while maintaining the architectural character of the original lodge.

University of Connecticut Hotel & Office Space

Goals & Objectives: Develop a complex to include hotel and conference center, retail and administrative office space specifically to reflect and support the University of Connecticut brand. The project should also reflect the character of the Storrs community.

Solution: The concept for the 16 acre development situates a new 100-room hotel and conference center immediately against a nature preserve in order to create a peaceful and attractive environment. Amenities include a restaurant, lobby and UCONN-themed sports bar, an ice cream café featuring the Ag School's famous products, indoor swimming pool, fitness center, and spa. The conference Center includes 5,600 SF of meeting space in a Grand Ballroom, meeting rooms and Board Room. Included in the master plan is a 100,000 SF Administrative Office Building to house university functions and private offices. The plan accommodates a second office building in a future development.

Wintergreen Resort

Goals & Objectives: Prepare a Study with design solution to develop a new full service Lodge for the Ski Resort. Evaluate how the Lodge can be positioned to functionally connect to existing amenities and maximize spectacular mountain views.

Solution: We developed a design solution that satisfied the functional relationship requirements, offered scenic views and presents a bold architectural impression that also compliments the existing facilities. The project is in the funding stage.

Waterfront Marina & Boathouse Bistro

Morgantown, WV

A marina featuring the Boathouse Bistro restaurant on the top level offers public boat docking situated on the Monongahela River in Morgantown's Wharf District. The lower level of the facility is home to West Virginia University's Crew team.

Cacapon Resort State Park Lodge Expansion

Berkeley Springs, WV

Summary: Located in the eastern panhandle of West Virginia, Cacapon Resort State Park is available for both family vacations and business retreats, offering access to golf, lake, and camping activities. The facility functions as the main lodging and meeting center of the resort and offers a mix of hotel rooms and suites, and a conference center. The new addition provides an additional 79 guest rooms, swimming pools, new dining facilities and commercial kitchen, and a spa and fitness area. Additional renovations to the resort includes existing guest rooms, golf course upgrades, as well as water and wastewater treatment upgrades.

Program/Goals: Enhance guest experience by providing additional quality lodging, meeting and recreational opportunities. Upgrade aging utility systems to assure long-term operation of the park.

Solution: By master planning the entire complex and creating an addition that fulfills the functional goals while maintaining the architectural character of the original lodge.

Waterfront Marriott Hotel Renovation Morgantown, WV

This 207-room Marriott Hotel renovation involved a complete transformation from the original traditional appearance to a contemporary European-inspired design. The entrance lobby was converted into a large open space which boasts a Starbucks, live edge bar, peninsula glass enclosed fireplace and penny mosaic pizza oven. The second floor houses an executive lounge and private exterior patio with gas fire pit. Each guestroom now has updated finishes, fabrics, and fixtures consistent with a contemporary European-inspired experience.

David H. Snider, AIA

Specifications | Quality Control

Mr. Snider graduated from Auburn University with a degree in architecture and practiced in North Carolina before returning to his hometown of Birmingham, Alabama. As one of the founding members he has spent the last 18 years of his 35-year career with Paradigm Architecture. His responsibilities with Paradigm Architecture have included project management, construction documents, contract administration, and writing specifications. Project experience includes hospitality, educational, healthcare, churches, libraries, schools, historic office buildings, airports, and commercial facilities. David has extensive experience with healthcare facilities throughout the duration of his entire career and currently manages open-end contracts with Russell Medical Center and Lanier Memorial Hospital. These project types include cancer centers, medical office buildings, physical therapy, assisted living facilities, and major hospital renovations.

West Virginia University Greenthouse

West Virginia Division of Natural Resources Project Goals and Objectives

- 2.1 Goal/Objective 1: Review existing plans, conditions and evaluate the site while communicating effectively with the owner to determine a plan that can be implemented in a manner that will minimize disruption and meet all objectives.

Paradigm Architecture and our consultants understand the process of evaluating existing plans and conditions and communicating effectively in order to minimize disruption to the Park operations and to meet all objectives. We have sought to define this in our narrative regarding Communication found in Section 3.1.a. with the Owner.

- 2.2 Goal/Objective 2: As a portion of this process outlined in Objective 1, provide all necessary services to design the facilities described in this EOI in a manner that is consistent with The Division of Natural Resources needs, objectives, current law, and current code; while following the plan to design and execute the project within the project budget.

Paradigm Architecture and our consultants understand the need to design the project in accordance with the Division of Natural Resource requirements and to comply with current codes. We have also defined our approach to managing the project budget in the narrative included in Section 3.1.b.

- 2.3 Goal/Objective 3: Provide Construction Contract Administration Services with competent professionals that ensures the project is constructed and functions as designed.

Paradigm Architecture and our consultants understand the importance of conducting construction administration services with competent professionals. We will assure that individuals directly connected to the design of the facility will continue involvement in the construction administration phase. Section 3.1.c provides more information.

Master Planning

Paradigm Architecture has successfully completed master planning for the Waterfront Development and Trinity Christian School in Morgantown, Avery Court in Parkersburg, and Glade Springs Resort in Daniels. In addition, we have performed master planning for Asian Plaza in Birmingham, AL, and have recently updated the master plan for Russell Medical Center in Alexander City, AL, as well as the West Virginia School of Osteopathic Medicine in Lewisburg, WV.

Corporate

Paradigm has designed entire office buildings as well as tenant fit-up spaces for clients such as Jackson Kelly PLLC, A.G. Edwards, Acordia, Petroplus & Associates Inc., National Biometric Security Project, Simpson & Osborne, DMJM Harris, and the West Virginia University Foundation. Projects also include banking regional and branch offices.

Governmental

Members of Paradigm have been involved in projects for the Federal Government in Charleston and Clarksburg, West Virginia. These commissions were awarded through design competitions and involved office space for Social Security, the Federal Bureau of Investigation, the Drug Enforcement Agency, the Small Business Administration, and hearing rooms for SSA Hearings and Appeals. Paradigm is also currently involved in several projects for the GSA in the Morgantown area.

Food Service

We have been privileged to design many food service facilities. These include private restaurants as well as large, full service commercial catering kitchens and banquet facilities. Examples include Two Waterfront Place Hotel and Conference Center, Morgantown Event Center, Regatta Bar and Grille, Boathouse Bistro, Sargasso Restaurant, Trussville Family Center, and Shono's Restaurant.

Hospitality/Multi-Family Housing

Our multi-family housing experience spans a variety of client types including student dormitories, hotel project, elderly housing, and private residential including single family homes, townhouses, and high end condominiums. West Virginia University Downtown Housing, the Condominiums at Two Waterfront Place in Morgantown, WV, as well as the Glade Springs Resort and Conference Center in Daniels, WV, are a few examples

Firm Profile

Paradigm by definition means an example that serves as pattern or model. The goal of Paradigm Architecture is to be an example in client service, design quality, and technical proficiency. We practice architecture. For every project, Paradigm works closely with the unique requirements of the particular client to design a structure that reflects both the appropriate image and proper function to optimize the working or living environment.

EXPERIENCE

Paradigm Architecture has experience in a broad range of project types. This work includes private individual, corporate, governmental, educational, and institutional clients.

Healthcare | Institutional

Medical and retirement life care projects dominate our staff's institutional portfolio. Medical projects include outpatient surgery centers, patient care rooms, emergency medicine, surgery suites, labor & delivery suites, Magnetic Resonance Imaging, X-ray diagnostic services, and heart catheterization spaces for hospital clients, radiation and chemotherapy treatment areas in cancer centers, and professional office space for private physicians. Retirement life care facilities range from independent elderly housing and assisted living facilities to full nursing care centers.

Educational

Higher Educational experience includes administrative office space, parking facilities, student housing, libraries, student centers, athletic facilities, classrooms, and research laboratory facilities. We have worked on campuses that include: West Virginia University, Fairmont State University, Davis and Elkins College, The College of West Virginia, Hampden Sydney College, Wake Forest University, Ayers State Technical College, The University of North Carolina at Greensboro, and The University of Alabama at Birmingham. Paradigm's staff has also been involved in educational facilities at the elementary and high school level including new and renovated buildings.

Two Waterfront Place

Firm History

Paradigm Architecture was formed in October of 2000 by a group of likeminded individuals who believe that architecture provides the opportunity to practice the career that we love. We as individuals and as team members of a firm have a responsibility to exhibit that passion in the manner in which we live our lives.

We chose the name Paradigm because it means a model that serves as an example.

This represents our highest ideals...

that our architecture would serve as an example

that our client service would serve as an example

that our service to our God would serve as an example.

Originally established in Birmingham, Alabama, Paradigm Architecture expanded in 2002 by opening an office in Morgantown, West Virginia. Our staff of ten includes five registered architects, three architectural technicians, and two administrative assistants.

It is our belief that we should assemble consultants that are uniquely skilled to satisfy the particular requirements of a project. We have close professional relationships with many engineers and specialized consultants and choose those that we feel will best serve the technical specialization, location of the work and sometimes even personality of the client. We choose not to work with firms who do not share our commitment to service and quality.

Re: **Blackwater Falls Lodge Renovations & Redecoration**
Request for Proposals for
West Virginia Division of Natural Resources

Dear Ms. Negley:

Paradigm Architecture Inc. is pleased to submit our proposal for Architectural/Engineering Services for the renovations and redecoration for Blackwater Falls Lodge.

Paradigm Architecture has developed a strong resume in the hospitality industry. This includes projects with the Division of Natural Resources. The Cacapon Resort Lodge which is scheduled to be completed in the Fall of 2020 is currently under construction. When finished, the project will include 79 new Guest Rooms, restaurant, spa, indoor pool and fitness area, and complete renovations to the existing Lodge which will house the front desk, lobby, additional meeting rooms and totally upgraded guest rooms. In 2011, the Canaan Resort Lodge, with its 160 rooms, grand lobby and updated public areas was completed. As with all State historic assets, we worked closely with the Division of Culture and History in the development of our designs.

Previously completed hotel projects include Two Waterfront Place Hotel & Conference Center in Morgantown and the Glade Springs Resort and Conference Center located in Daniels, WV. We also were commissioned to execute the renovations of the Waterfront Place Hotel to convert the facility into a full-service Marriott Hotel in 2016.

Paradigm is currently working on the renovation of the historic Courtyard Blackstone in Fort Worth, Texas, as well as the full-service Holiday Inn & Suites in Beckley, West Virginia. We are involved in the development of an updated prototype extended stay facility for MainStay Suites in Carlisle, Pennsylvania. Finally, our work includes studies for the Wintergreen Resort Lodge, West Virginia University Hotel & Conference Center, and a Hotel & Conference Center for the University of Connecticut.

For the Blackwater Falls Lodge project, we have assembled a team of experienced engineers and designers. For Structural Engineering, we have included the services of Allegheny Design Services of Morgantown, WV. Miller Engineering will serve as Mechanical, Electrical, and Plumbing Engineers; Design Innovations will provide Interior Design; with Pat Stinson providing cost estimating for the project. We have extensive relationships with these professionals and have successfully completed many projects together.

We understand the emphasis that you have placed on communication and adherence to budget and schedule. In our proposal, we have addressed these issues in detail and provided a history of our performance. We would encourage you to contact our references and verify our performance on previous projects.
