South Charleston, WV 25303

The following submission is offered as LAI Inc.'s expression of interest and response to the State of West Virginia's Expression of Interest for A/E Services for North Bend Lodge Renovation and Redecoration located in North Bend State Park, 202 N Bend Park Rd, Cairo, WV 26337.

State of West Virginia Solicitation Number AE01 0310 DNR1900000010

1. **Executive Summary**

Lakeside Architecture, Inc. (dba LAI, Inc.) is a corporation registered in the State of West Virginia. LAI, Inc. (LAI) provides Full Architectural services from Master Planning to Construction Administration. LAI currently has two offices in McHenry, MD and Fairmont, WV. The firm was established in 2002. LAI collaborates and teams with prequalified, experienced and reputable Professional Consulting Services in all the disciplines required to provide a total solution for Concept, Feasibility Study, Project Design, Management and Administration to guarantee our clients, owners and stakeholders satisfied with the transparent process and development to finished working facility.

CJL Engineering has been one of the premier MEP/FP Professional Engineering firms we are working with currently and in the past. If LAI is selected, CJL will be a sub-consultant for the Engineering Design for the MEP/FP disciplines. Their qualifications are attached and bring solid experience and personnel to our team.

2. **Project Goals & Objectives**

Goal/Objective 1: A successful strategy in any building renovation project is to first and foremost understand what the Design Team has to work with in regard to existing building construction. Construction Type, "Back of the House" Clearances such as ceiling plenums, shafts and crawlspace typically play a major role in the decision-making process as to which mechanical and electrical systems can be practically put into place. Construction installation logistics, as well as the long-term operation and serviceability of systems all depend on the thorough understanding of the options and limitations the existing building give us. Experienced Team-The proper balance between design and cost is integral to LAI's and CJL's approach to accurate design. As your architect/engineer team, it is our responsibility to develop a comprehensive, efficient, and reliable design at a cost that is both reasonable and in line with the project budget. We accomplish this through substantial involvement by our most experienced architects/engineers, including those who participate in the QA process. As with other similar type projects, a thorough walk-thru of the facility would be the proposed first step. Along with gathering information on existing construction, this recon would also allow for an understanding of the existing systems currently in place.

Goal/Objective 2: Communication - One of our fundamental working philosophies is a strong emphasis on interaction with the Owner, Construction Manager and other professionals on the design team from the onset of the project. This helps to integrate the design into the beginning phases of the project. LAI's and CJL's Principals and Senior Staff represent the firm at all meetings, and prepare and review all communications. Responsive and timely communications are standard operating procedure. The same architects/engineers that developed the design will remain involved through the completion of the project, insuring continuity and the benefits of experience in the construction of the project. The senior architects/engineers spend time in the field working with the construction team to resolve any issues, thereby creating a better understanding of the design intent and a less adversarial relationship between the engineers and the contractors. This will enable our team to identify and resolve problems encountered during construction more effectively. Our architectural and engineering team members plan, develop, evaluate and analyze throughout each phase of the project, while coordinating with the client, the project team, appropriate agencies, and utilities at each step. The resulting design decisions are documented in the project team minutes of meeting, in reports, and our drawings. Through this process, project changes are minimized, allowing our clients to make informed decisions during each stage of the design process, while the opportunity to influence or modify project direction remains available. The ongoing design coordination done effectively and in collaboration with the construction team results in a much better understanding of the design intent on the part of the construction team. This further reduces misunderstandings and construction problems in the field.

Goal/Objective 3: Quality Documents - The high quality and accuracy of our documents result in fewer problems during the construction process, minimal change orders and more effective communication and relationship with contractors. As our standard operating process, focuses on accurate documentation and written communications throughout the project. Project documentation is rigorously maintained in a project manual, including reports, calculations, correspondence, punch lists, and utility coordination. This process ensures maximum clarity of concepts and design decisions.

3. Reasons to select LAI/CJL Team

Location / Distance from Cairo, WV:	LAI Fairmont, WV	72 miles
	CJL Morgantown, WV	91 miles

Collaboration: LAI and CJL use the latest A/E Design & Drawing Technology to expedite drawings and specification electronically as well as to eliminate mistakes and redundant work efforts. Thus insuring on-time construction documents and immediate replies to contractors for RFI's

Hands on Architecture and Engineering: LAI and CJL have established proven processes that enable contractors to quickly communicate and request changes on the go. This communication and relationship with the contractors eliminates finger pointing and uses that energy to solve any issues that arise during the project.

Codes and Permits: LAI and CJL have extensive experience with Local, State and Federal guidelines and regulations as it pertain to A/E design of new and renovated public buildings

Availability: LAI and CJL are ready and available to begin kick-off meetings and design for this conversion project within one week of award. The principals of each company have committed to prioritize this important state project. LAI and CJL will commit to make any interviews if selected for this project.

1 FIRM OVERVIEW

FIRM PROFILE

Lakeside Architecture, Inc. (dba LAI, Inc.) is a corporation registered in the State of West Virginia. LAI, Inc. (LAI) provides Full Architectural services from Master Planning to Construction Administration. LAI currently has two offices in McHenry, MD and Fairmont, WV. The firm is a Woman-Owned Small Business and was established in 2002.

LAI has an abundant database of projects with a wide variety of scopes and services, many of which are in West Virginia, with numerous owners including government funded projects. LAI has a plentiful list of repeat clients based upon our continuous record of quality, knowledge, design, customer service, prompt deliverables and on/under budget fees.

LAI currently employs 5 people which include: 1 Licensed Architect, (registered in 4 states and NCARB certified), one Project Manager, and 3 Contract Employees.

LAI has been immersed in the architecture of government, residential, commercial, industrial, office space, health care, hospitality, and multi-family building types for years. Growing out of a mountainous setting in the Deep Creek Lake area of Maryland the fluid studio also practices out of the urbane fabric in Fairmont, West Virginia. Employing an energetic, young and highly educated staff no project is too large or too small for LAI Architects to design as long as the work is striving for greatness, artful response and a rigid responsibility to quality and sustainable permanence.

LAI strives to increase the ideal of the building to an extremity of details, where the details contain the heart of a building, the heart of its own ideal. Through this we find the greatest wealth - the wealth of the individual soul of men and women - which contributes to a material wealth that is provided for by our good work, good relationships with clients and a great reputation.

The presence of West Virginia University allows LAI Architects to look to the broad future of expanding our realm to the global spectrum of architecture, while tapping the creative energy of a great university for upcoming projects. LAI Architects interviews, carefully, developmental clients that seek to commercially develop projects with quality over quantity. LAI Architects is servicing clients in a quality projects are on the design boards at the LAI studio to be constructed on beautiful sites in the rural landscapes near the Morgantown area and Deep Creek Lake / Western Maryland.

The firm, works closely with proven sub-consultants as well as local craftsmen such as cabinet makers, steel fabricators, blacksmiths, and various consultants and engineers nationwide. LAI Architects utilizes a broad range of technological tools to obtain architecture, computer BIM (building information model) software, computer drafting software, graphic design software, physically built models of different materials, physical material and discipline written research.

FIRM OVERVIEW

Established in 1938, CJL Engineering is a full service, mechanical, electrical, plumbing, fire protection, and civil/structural consulting engineering firm known for mastering the most challenging projects in the region. With offices in western Pennsylvania, eastern Ohio, northern West Virginia and Maryland, our super-regional focus has enabled us to become one of the preeminent MEP firms in the industry, proudly serving a wide range of specializations and clients.

Range of services:

- Analysis and concept
- Construction budgeting
- Building information modeling (BIM)
- Energy modeling
- Detailed construction documents
- Construction phase services
- Building commissioning

More than 155 personnel, including:

- 40 Professional Engineers
- 28 LEED® Accredited Professionals
- A Certified Energy Manager (CEM)
- Commissioning Process Management Professionals (CPMP)
- Building Energy Assessment Professionals (BEAP) and NICET Fire Protection
- Life Safety Systems Certified Engineers

A broad range of clients

- Green Buildings, Science, Laboratory and Research Facilities
- Healthcare - Hospitals, Urgent Care, Medical Centers and Labs
- Education - Colleges, Universities, Trade Schools, K-12
- Corporate, Commercial, Office Buildings
- Industrial - Light and Heavy Manufacturing, Warehousing
- Performing Arts Centers, Museums, Theaters and Libraries
- Government and Secure Facilities
- High Tech Buildings/ Mission Critical Data Centers
- Hotels, Ice Arenas and Sports Facilities
- Apartments, Dormitories and High Rise
- Central Plants, Energy Facilities and Utility Distribution Centers
- Historic and Adaptive Retrofit
- Master Planning and Design

Specialization

- HVAC Systems
- Electrical Systems
- Fire Detection and Protection
- Plumbing Design
- LEED® Green Building Design
- Commissioning
- Energy Modeling Solutions
- Civil / Structural Engineering
- Architectural Lighting and Controls
- Telecommunications
- Life Safety Systems
- Voice/Data/Audiovisual
- Security Systems
- Power System/Quality Evaluations
- Life Cycle Analyses
- Retrofit Evaluations
- REVIT® / BIM

PROFESSIONAL SUMMARY

Adam Hale is a Mechanical Engineer at CJL Engineering. He joined the firm in 2008 as an intern and became a full-time employee in 2010.

Adam is responsible for the design and specification of HVAC and other mechanical systems for educational, healthcare, commercial, and corporate clients. He surveys existing facilities and systems to confirm and evaluate their condition. He conducts engineering studies, establishes design criteria, and estimates project costs. He is also responsible for communicating project needs and requirements between owner, architect, engineer and client.

3 EXPERIENCE

LAI / CJL Team Experience

Mt. Laurel Medical Office Expansion Oakland, Maryland

Prime – LAI, Inc. - Architects

CJL Engineering provided the MEP/FP design service for the 5,000 SF addition to the existing two story medical office. The scope of work included design of the new VRF HVAC system, plumbing and fire protection system extension, electrical power extension, lighting system design, fire alarm system extension and coordination with LAI Architects, Owner and Civil Engineers.

Cost: \$500,000.00
Design: 2017
Construction: 2018

Broadford Park Amphitheater Electrical Design Oakland, Maryland

Prime – LAI, Inc. - Architects

CJL Engineering provided the electrical design for the new Amphitheater located on the fishing dock side of the lake at Broadford Park.

The electrical scope of work included electrical design service for the lights, power for amps, speakers, and coordination with AV system. CJL coordinated with LAI Architects, Civil Engineer, utilities and other public agencies having jurisdiction as pertained to the new Amphitheater.

Cost: \$85,000.00
Design: 2017
Construction: 2018

Lonaconing Town Hall Lonaconing, Maryland

Prime – LAI, Inc. Architects

CJL Engineering is providing MEP design for the new 1,700 SF single story Lonaconing Town Hall. The scope of work includes design for HVAC system, plumbing, fire alarm system, power, telecommunications, and lighting systems. CJL will coordinate with LAI Architects, Owner and Civil Engineer.

Cost: \$122,000.00
Design: 2017
Construction: 2018

Puskar Center Performance Dining Facility

West Virginia University, Morgantown, WV

THE PROJECT

CJL Engineering was contracted to provide mechanical, electrical, plumbing and fire protection engineering services for the \$3.4 million kitchen and dining renovation at the Puskar Center Training Table. The existing kitchen and dining facility was completely modified, with new arrangements of equipment and service areas. This facility will be an asset to WVU's student athletes, providing them with healthy food options, the athletes will learn how fueling their bodies help them to perform their best.

CJL DESIGN SOLUTIONS

- As part of the design development phase meetings, CJL reviewed opportunities with the project team and users to achieve an energy-efficient project.
- Conducted surveys to obtain existing site information necessary to develop engineering design.
- Provided kitchen ventilation equipment, such as, kitchen hood exhaust fans, kitchen hood make-up air units and kitchen DOAS RTU.
- Provided an extension of the existing Siemens DDC automatic temperature control system. The system included new control panels, control wiring, control valves, thermostats, switches, relays, controllers, and other accessories.
- Provided double check backflow preventer for all ice maker, dishwasher, and pre-rinse sink water connections.

Oglebay Hall, Forensic Science Lab

West Virginia University, LEED® Certified, Morgantown, WV

CJL revamped the mechanical and electrical systems to meet the stipulations for the building transformation, into the state-of-the-art forensic science center that it is today.

THE PROJECT

West Virginia University transformed its historic 54,000 sf Oglebay Hall into a state-of-the-art forensics laboratory and classroom building. Dating from 1916, the new 74,000 sf building includes DNA and molecular biology laboratories, electron microscopy, bone analysis, gas chromatograph, ballistics analysis, blood, fingerprint, and trace evidence analysis facilities, as well as classrooms, faculty and graduate student offices, and new auditoriums. The project is designed to achieve a LEED® certification.

CJL DESIGN SOLUTIONS

- HVAC systems provide exceptional indoor air quality and energy efficient performance. Variable speed drives reduce energy use during part load conditions, and the HVAC systems use environmentally friendly refrigerants.
- Ventilation levels in non-lab areas automatically adjust for the number of occupants. Generous fresh air volumes are 'scrubbed' with MERV-13 high efficiency filtration and ultraviolet (UV) lights that reduce airborne contaminants.
- Bridge tie in to new campus wide chilled water distribution system.
- Routing of campus loop piping through the basement and crawlspace.
- Building chilled water pumps equipped with variable speed drives for energy savings.
- Equipment selected with 15 degree chilled water temperature rise to increase central plant efficiency and reduce building pipe sizes.
- High performance window glazing system for beneficial daylight will reduce thermal losses and solar heat gain. Lighting systems adjust to daylight levels and automatically allow for dim and shut off, saving energy.

NASA IV&V Facility

West Virginia University, Fairmont, WV

CJL modernized the mechanical and electrical systems for this 50,000 square foot super computer center to help achieve total power redundancy.

THE PROJECT

The Independent Verification and Validation Center was built by West Virginia University for NASA. CJL Engineering was responsible for the facility's Mechanical and Electrical Engineering Design. Achieving total power redundancy was a priority for this 50,000 sf super computer center.

CJL DESIGN SOLUTIONS

- Chilled water systems with redundant chillers and air-handling units with variable frequency drives.
- Under-floor chilled water loop.
- Redundant chilled water and hot water pumping systems with VFD.
- Energy management system with monitoring and alarm sensors.
- Two 4000-amp 480-volt independent primary power feeds from separate power companies for system redundancy.
- Two 1000 KVA generators, with provisions for a third, provide generator / utility paralleling.
- 1000 KVA uninterruptible power supply (UPS) and 15-minute wet battery backup.
- Emergency diesel generators with a redundant unit, and provisions for a fourth, supply the entire building with back-up power.
- Under-floor duct system for computer, communication, and power cable.

Hidden Valley Resort, Lodge Complex

Hidden Valley, PA

THE PROJECT

Hidden Valley is an intimate resort featuring 26 well-groomed trails and slopes, a 18-hole championship golf course and the Trillium Spa. Utah-based, Jack Johnson Company was hired to implement a five-year master plan. The First Phase of this program was the \$30 million renovation of the Hidden Valley Condo / Lodge and Clock Tower Complex. The structure includes a multi-tenant high-rise, full kitchen, combination interior / exterior pool, offices and retail areas. CJL Engineering was contracted to design the mechanical, electrical and plumbing system improvements.

CJL DESIGN SOLUTIONS

- Multiple system options for the HVAC include: 4-pipe fan coil system, 2-pipe heat pump system, air-cooled heat pump system and large air handling units for outside air.
- All tenant utilities will be individually metered.
- Central boiler system, central chiller system and units for humidification for the pool area, and make-up units for kitchen exhaust.
- A new 277 / 480V, 3,000 amp electrical service was provided for the new resort component.
- Plumbing enhancements include: multiple domestic hot water options, individual water heater system, central boiler system, interior storm piping, and interior gas piping system.
- New plumbing connections for the kitchen and pool areas.

Nemacolin Woodlands Resort & Spa

Chateau Lafayette, Farmington, PA

THE PROJECT

CJL Engineering provided the electrical engineering design for Chateau Lafayette, a five-story, 124-room luxury hotel located at Nemacolin Woodlands Resort. In addition to its European amenities, the Chateau Lafayette features a grand marble-clad reception area, the Lautrec Restaurant, the 8,700 sf. Marquis Ballroom and upscale shops, all of which received unique specialty lighting applications.

CJL DESIGN SOLUTIONS

- Provided the comprehensive electrical component of the hotel construction including lobby areas, guest rooms, office areas, restaurants, a kitchen and support areas.
- Coordinated the design of the Electrical Systems and lighting for the hotel with the project's interior designer.
- The design included all voice / data / security and point-of-sale communication systems, as well as the coordination of specialty lighting and sound systems.

DGS 163-36, Presque Isle State Park Upgrade Beach/Shower House and Concession Building, Erie, PA

THE PROJECT

CJL Engineering was contracted to provide mechanical, electrical and plumbing design services for the beach/shower house replacement. Presque Isle State Park is a 3,200-acre peninsula that arches into Lake Erie. Presque Isle offers its visitors a beautiful coastline and many recreational activities, including swimming, boating, fishing, hiking, bicycling, and in-line skating.

CJL DESIGN SOLUTIONS

- Full MEP engineering design.
- Provided all necessary documentation required by DGS for each phase of design.
- Attended design meetings as required.
- Attended DGS review meetings at each design phase.
- Reviewed RFIs during bidding process and issued bulletins.
- Reviewed MEP submittals.
- Performed one site visit per month during construction.
- Provided final punch list.
- Prepared "Record Drawings" and reviewed O&M manuals.

State Office Building #3, LEED® Certified

West Virginia Capitol Complex, Charleston, WV

CJL provided a comprehensive retrofit and modernization of all mechanical, electrical and plumbing systems that lead the building to achieve LEED® Certification.

THE PROJECT

The West Virginia State Office Building #3 is a 235,000 sf 10-story limestone-faced structure that is part of the Capitol Complex in Charleston, WV. Built in the early 1950's the structure houses a number of different state offices. The building required a comprehensive retrofit and upgrade of all mechanical, electrical and plumbing systems. Following its architectural and engineering retrofit, the building achieved LEED® Certification.

CJL DESIGN SOLUTIONS

- All existing MEP equipment was replaced with new systems and the building was brought up to meet current code requirements
- Heating and cooling systems were connected to the existing campus wide steam and chilled water systems
- New electrical service and equipment were provided to serve the building including a new emergency generator
- All new plumbing systems, including new fixtures, were installed
- Fire protection systems were installed for a fully sprinklered building with a new fire pump located in the basement
- The building is LEED® Certified

STATE OF WEST VIRGINIA
Purchasing Division

PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.
