RE: Architectural and Engineering Services for North Bend Lodge Renovations
(Solicitation Number: AEOI 0310 DNRI900000010)

Dear Mrs. Ingraham:

Williamson Shriver Architects, Inc. was excited to learn of the Expression of Interest for Architectural and Engineering services for the North Bend Lodge Renovations for the West Virginia Division of Natural Resources. We are pleased to have an opportunity to submit our team's qualifications, experience, and other credentials for your consideration.

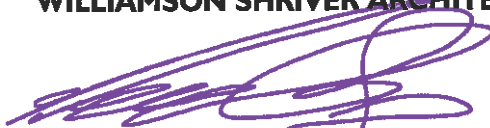

Williamson Shriver Architects' staff combines for over 100 years of experience on hundreds of architectural design projects of all types and sizes located throughout West Virginia. Our firm has established practices in place to ensure that your project is completed on time and within budget. Our design, engineering, and construction administration talents have been proven over and over throughout our firm's thirty-five plus year history.

Please accept this letter as our team's Expression of Interest in serving as your design team for this exciting project. In addition to Williamson Shriver Architects, Inc., our proposed project team will include Harper Engineering, of St. Albans, WV (HVAC, electrical, plumbing, and fire protection design) and Watkins Design Works, of Charleston, WV (Interior Design). Our firms have worked together successfully on many past projects throughout all regions of the state. We jointly have a strong understanding of design creativity, building systems and materials, constructability, and the economics of construction in the different regions of West Virginia. We invite you to review the attached Statement of Qualifications which describes in depth our team's capabilities, experience, and personnel and includes all of the information delineated in your Expression of Interest.

We are excited about this project, and are eager to be selected to work with the West Virginia Division of Natural Resources for the North Bend Lodge Renovations as the Architect. We look forward to a personal interview with your selection team during which we can present our credentials in greater detail.

We look forward to hearing from you soon.

WILLIAMSON SHRIVER ARCHITECTS, INC.

Ted A. Shriver AIA • LEED AP
President / Architect

General Information

Firm Overview

Williamson Shriver Architects Inc. is an award-winning, multi-disciplinary design firm with business roots back to 1967. While specializing in educational and commercial planning and design, we provide design services to a diverse client base throughout West Virginia. With construction values exceeding one billion dollars over our history, the size and scale of our projects have ranged from detailed designs for small interior renovations to large multi-million dollar new facilities. Large or small, simple or complex, every project has our commitment to diligent, thoughtful design. Our functional and distinctive buildings reflect the vision of our clients and the spirit of our communities.

Experienced, capable, and responsive, we have a long tradition of excellence and client commitment. Simply put ... we listen ... and combine what we learn from

listening with a clear understanding of technology, sustainability, and a wealth of experience. Every Williamson Shriver Architects design is a collaboration with the end user. Our finished projects work for people because they start with people. Through focus groups, individual interviews, and public meetings, we ask our clients to stretch their imagination and anticipate how they will

The Vision of our Clients and the Spirit of our Communities.

use each space. The result of this process ... flexible design solutions that respond to people and make the most of budgets.

Commitment to quality, dedication to project and client, and a nearly fifty year tradition of innovation and architectural excellence... that's Williamson Shriver Architects. No matter what the program, site, or budget, we've been there and we have the experience and vision to shape your project into a success.

At Williamson Shriver Architects, we're listening.

Firm History

Harper Engineering, PLLC was founded in 2008 to provide innovative engineering design services to architects, owners, and contractors through the state. We are a unique combination of eager young talent and proven experience fused together to serve all of your building systems design needs including HVAC, Plumbing, Lighting, Electrical, Fire Alarm and Sprinkler Suppression systems. Our Goal is to design optimized systems that meet all of our client's performance, energy use, and budgetary needs.

Relationship

Harper Engineering, PLLC has worked with Williamson Shriver Architects, Inc. since 2008. We have amassed over 80 projects together. (* Indicates more than one project at that location)

Firm Profile

ABOUT

Watkins Design Works is a commercial interior design and green building consulting firm. We offer all facets of interior design services for government, hospitality, corporate, higher education, healthcare, retail, military, and architectural clients. Jill Watkins, Owner, has over 25 years of experience designing a wide variety of commercial interiors and working with architects, engineers, and other consultants. Her project experience ranges from 123,000 square feet of corporate headquarters to 1,000 square foot tenant renovations...from an \$85 million dollar project for a national guard base to kitchen and bath renovations at a low-income multi-family housing facility. From programming through construction administration, from conceptual color palettes to custom millwork detailing, Watkins Design Works will be involved with you throughout the entire process, to design functional and beautiful interiors that support your staff, your needs, and your vision.

We also provide overall guidance, eco-charrette facilitation and in-depth knowledge of the LEED Green Building Rating System for clients interested specifically in green building. By embracing an integrative design process, where designers, architects, engineers, contractors, and all stakeholders are involved in a design project early and often, we are able to connect the built environment with the natural environment, so that quality of life is improved for end users and local habitat is regenerated. Economic savings are realized through this early decision-making process, rather than diminishing value through traditional "value engineering" at the end of the design process. Thus, the triple bottom line of sustainability is inherent in everything we do: environment-equity-economy, each considered in equal parts.

Qualification and Approach

WilliamsonShriver**Architects**

Project Approach & Understanding

Project Approach

As fully described in Tab E of this Statement of Qualifications, Williamson Shriver Architects has a variety of projects fully constructed with similar size and design requirements to the project by the West Virginia Department of Administration.

The success of those projects are not by accident. It is said, good design comes from good listening. You are not hiring an architect to “tell you how to design and build your building” Rather, you are hiring an architect to compose a design by synthesizing the specific needs, activities, skills, and limitations of your department, personnel, and site into a holistic, responsive design. Williamson Shriver Architects continually stresses the importance of involving the building user throughout the design process and facilitating their input into a final program and design solution.

This planning process starts with the schematic “big picture” design concepts and continues all the way to small details including interior design and furniture selection. We utilize a variety of methods in this process to make the design intent more understandable to lay-person committee members. These include presentations, design charrettes, interior and exterior 3D concepts modeling, digital walkthroughs and

general discussions and feedback.

We firmly believe that our track record of these successful projects is directly attributable to this inclusive and interactive process with our clients.

Williamson Shriver Architects has reviewed the scope of work provided for the Division of Natural Resources. We understand the scope of work is funded by the State of West Virginia as follows:

- Provide full design services which include architectural, structural, mechanical, electrical, plumbing and interior design and construction administration for renovations of the existing North Bend Lodge located in Cairo, WV.

Design Management

Williamson Shriver Architects is a mid-sized firm but with a small-firm attitude of service to our clients. Principal Ted Shriver, is actively involved in all aspects of all the firm’s projects from concept to completion. To ensure

consistency of quality design, all planning and design concepts originate under the direct supervision of the partners.

On this project, Ted Shriver will be the Architect of Record and will directly oversee all design activities as well as be the main point of contact with the Owner. Directly under Mr. Shriver’s leadership, Greg Martin will serve as Project Architect, and will be assigned with the responsibility to produce documents and specifications based upon the design as well as to coordinate all team member activities and contributions to the project.

Above: Front facade of the Chief Logan State Park Lodge. The right conference center was completed in 2001 and the left guest suite addition was complete in 2006

Project Approach & Understanding

Continued

For mechanical/electrical engineering and interior design services on this project, Williamson Shriver Architects will team with two consulting firms specifically selected to provide the most comprehensive, highest quality specialty services relating to this project.

• Harper Engineering, a St. Albans, WV consulting engineering firm who will provide HVAC, electrical, plumbing and fire protection design services.

• Watkins Design Works, of Charleston WV, will provide interior design services for project.

Design Schedule

A master project schedule will be prepared to reflect all of the work tasks for the project organized by design phase and showing timelines and milestone dates for all tasks. We will also show the organization/individual responsible for the task. It will be organized as a horizontal bar chart. The schedule will be tested at critical intervals and measures taken to assure the schedule is maintained. Work efforts are tested against progress so that potential conflicts and delays can be detected quickly and appropriate action taken immediately to preserve scheduled milestones.

Design Development Phase

With the project consisting of

renovation and repair to existing structures the early phases of initial programming and schematic layout will not be required. The design team will progress to the design development phase of the project which will discuss the areas of repair and renovation. The Design Development Phase documents advance the approved schematic design by illustrating and describing the architectural, structural, mechanical, and electrical components and systems, and other elements through the

We continually stress the importance of involving the building users in the design process and facilitating their input...

use of plans, sections, elevations, typical construction details, and diagrammatic layouts of the building systems as well as other documents to fix and describe the size and character of the project. Important details of construction will be shown, any necessary selective demolition and alterations will be indicated, interior design elements including furnishings and equipment will be conceptually defined, construction materials will be generally selected, and the building systems will be outlined and integrated with the building structure and architecture. Outline specifications will be writ-

ten and all building performance specifications will be updated. A cost estimate will be prepared reflecting the work described in the Design Development documents along with appropriate strategies to deal with any cost issues which may arise. The completed Design Development document package will be submitted to the Owner and authorities having jurisdiction for review and approval.

Construction Documents Phase

Upon approval of the Design Development Phase drawings, the project team will prepare closely coordinated construction drawings and final specifications detailing the quality levels for materials and systems needed for bidding and construction. The design team will also incorporate into the Construction Documents the design requirements of authorities having jurisdiction over the project, including but not limited to the Americans with Disabilities Act, applicable state and local building codes, ordinances, and standards, and any standards provided by the Owner. To enhance the coordination effort between the disciplines, all team members will utilize AutoDesk Revit Building Information Modeling software in the preparation of these documents.

The work of this phase will include furthering the interior

Project Approach & Understanding

Continued

design concepts previously developed by selecting material colors and patterns for inclusion into the project. Additionally, furnishings and equipment appropriate to the function and quality of the proposed design will be selected. The design team will meet as needed with the Owner to gain input regarding these interior design elements.

The design team will confer with the Owner to develop and prepare bidding and procurement information, the contract for construction, as well as the conditions of the contract for construction. All of these documents will be contained within the final Project Manual to be released to potential contractors.

The project cost estimate will be updated reflecting the work described in the Construction Documents along with appropri-

ate strategies to deal with any cost issues which may arise. The completed Construction Documents package will be submitted to the Owner and authorities having jurisdiction for review and approval.

Bidding Phase

Williamson Shriver Architects will assist the Owner as necessary in the advertising of the project for bidding. To further competitive bidding, we will actively market the project to contractors known to specialize in work consistent with the project scope. We will assist the Owner as needed in conducting the bid opening. On behalf of the Owner, we will evaluate the bids received and delineate any options for award, and provide our recommendation as to the award for a contract for construction that is in the best interest of the Owner.

Contract Administration Phase

The construction phase may be a small portion of an architect's fee, but this phase plays a large role in our success. After the commencement of construction, Steve Gibson will take the lead during the construction process. Mr. Gibson has 30+ years experience as a contract administrator with Williamson Shriver Architects on all project types. As such, he is well known and respected by many commercial contractors around West Virginia. During this phase, he will be assisted by numerous

members of the design team who will continue their roles from the design phases.

Member(s) of the project team will be present on the project site at two-week intervals, will attend all construction progress meetings, will become generally familiar with the progress and quality of the work completed, and will determine in general that the work is being completed in accordance with the Contract Documents. On behalf of the Owner, we will reject any work not conforming with the Contract Documents.

In between site visits, Mr. Gibson, with assistance of project team members will review and take action on contractor submittals, process change orders and payment requests, issue field memos and clarifications as needed, prepare punch lists, and certify completion of the project.

Post-Construction

Williamson Shriver Architects team will not walk away from a project at final completion. Rather, we continue to assist our clients with warranty issues which may arise after completion. We will also conduct an eleven month walkthrough to observe any other warranty issues, and also will conduct an interview with a committee of the Owner's staff and building users. This feedback will allow the project team to evaluate the performance of

Project Approach & Understanding

Continued

the final design, to determine whether the design adequately meets the Owner's needs, and gives our team members valuable input helping us to improve our knowledge for services on future projects.

Even after the expiration of the twelve month warranty period, Williamson Shriver Architects continues to service clients on our completed projects. Time and again throughout our firm's history, we have assisted Owners of our completed projects years after occupancy on issues relating to the function of building components and systems. Never once have we invoiced for these services.

Quality Control

Cost Control

It is vitally important that the project budget, program and outcome expectations are compatible from the outset. Once the initial project budget and project scope is established and agreed upon, all future cost estimates and design decisions will be measured against that budget and program. As indicated herein, further cost evaluation will be performed at the completion of schematic and design development drawings, and at 75% completion of contract drawings. Between formal estimates, the design team is constantly evaluating design and materials/specification alternatives in an on-going effort to achieve the project goals in a cost effective manner and to

maximize the value of the funds available for the project.

Design Technology

All of our major consultants use Autodesk Revit, a Building Information Modeling (BIM) software product. As a result, BIM will be utilized throughout the design process. Well beyond traditional drafting software, BIM is a more holistic approach to building design and culminates in an electronic 3-dimensional model of the building and contains 'intelligent' components. This product is not only a valuable production tool for the design team, but also offers several benefits to the Owner. For example, it's 'clash detection' capabilities offer better technical control of the coordination between work of multiple disciplines, reducing the number of potential change orders during construction. The software also allows for enhanced clarity of contract documents, and provides a potential facilities management benefit for clients through the manipulation of the intelligent components contained within the model. Williamson Shriver Architects was among the first architectural firms in West Virginia to routinely utilize BIM software on our projects.

Quality Management

Williamson Shriver Architects is proud of our success rate for meeting tight project budgets with a low incidence of construction change orders. We believe

that this success stems largely from the retention rate of our long-term staff and selection of consultants that are highly specialized in the type of project being designed.

We have several peer review steps in place to review Construction Documents prior to letting them out for bidding. These include a design partner coordination review, review by the Construction Administrator who has jobsite experience, and involvement of nearly all of our production staff in the preparation of technical specifications ... whether or not they are otherwise working on the project ... to assure that the documents are reviewed by a "fresh set of eyes". All of these steps taken together, eliminate most design errors before they make it out of our office.

As products and product applications are constantly changing, our staff and consultants are continually updated on new materials and methods of construction through both internal and outside seminars and programs.

Lastly, utilization of Building Information Modeling (BIM) software greatly reduces the potential for design errors. This is due in part to the integrated approach in which the software cross references information, as well as its potential for clash detection.

Mechanical, Electrical, and Plumbing Engineering

Harper Engineering, PLLC has the talent and resources to provide quality mechanical, electrical, and plumbing design. Our staff utilizes the latest building information modeling (BIM) software to provide the accurate system designs with minimal change orders during construction.

Our goal is to design optimized systems that meet all of our client's performance, energy use, and budgetary needs.

The staff at Harper Engineering, PLLC has over 100 years of experience working with clients in a variety of fields including but not limited to K-12 schools, hospitals, offices, airports, manufacturing, multi-family housing, and Design/Build.

The following is a partial listing of projects that demonstrate Harper Engineering's mechanical, electrical, and plumbing design experience:

- South Charleston Fire Station No. 1
- Chapmanville Intermediate School
- Franklin Elementary School - Design/Build Criteria Developer
- Additions to Holden Elementary School
- Williamson Coal House
- River Ridge Church- Hurricane
- Seneca Village Housing
- Beckley VA Parking Garage
- West Virginia Department of Highways
 - SRC Office Building Renovation
 - Weigh Stations
 - Highway Lighting
- Mason County Sheriff's Office Renovation
- Stonerise Nursing Homes (Multiple Projects)
- Boone County Courthouse Annex
- City of Charleston Fire Station No. 3
- A New Ronald McDonald House for Southern West Virginia
- North Central West Virginia Airport (Multiple Projects)
- Yeager Airport Security
- CAMC Hospitals (Multiple Projects)

- Level 350 BIM* Coordination for School Building Authority Projects
 - Shady Spring High School, Raleigh County Schools
 - New Raleigh Elementary School, Raleigh County Schools

* BIM - Building Information Modeling

Jill M. Watkins
Owner

Watkins Design Works provides all aspects of commercial interior design services, including:

- Programming
- Schematic design, space planning, and design development
- Contract and bid documents
- Interior construction administration

Jill Watkins, Owner, has over 25 years of commercial interior design experience, which includes working alongside architects and engineers during all parts of the design process for many different project types. Government clients are unique in that the expenditure of taxpayer dollars is often scrutinized, and value for service must be evident. Our commercial interior design services offer many benefits and value to government clients, including:

- Maximizing tight budgets for maximum impact, both aesthetically and functionally.
- Knowledge of furniture and office design trends to improve worker productivity and provide meaningful amenities for staff.
- Knowledge of various purchasing contracts available to government agencies.

From programming and space planning through construction administration, from developing conceptual color palettes to custom millwork detailing, Watkins Design Works will be involved with you throughout the entire process to design functional and beautiful interiors that support your staff, your needs, and your vision.

Watkins Design Works is a commercial interior design, green building, and sustainability consulting firm established in 2014. Our work is primarily focused in West Virginia and surrounding states.

CURRENT AND RECENT PROJECTS

West Virginia State Parks, multiple projects

Client: WV Division of Natural Resources, State Parks Section
Project: Furniture, Bedding, and Window Treatments Approx. Size: 31,425+ SF
Locations: Twin Falls, Pipestem, Cass Scenic Railroad, Watoga, Blackwater Falls Cost: \$687,902+

We were first hired by the WV State Parks to provide interior design services for Twin Falls Resort State Park's Walter Gropius-designed cabins. Services included furniture arrangements, interior finishes, window treatments, and artwork selections. This project expanded to include the cabins at Pipestem (square footage and cost listed above include these two parks). Design for these parks is in keeping with the modernist style of the original architecture, and includes both commercial-grade furniture and WV-made furniture, environmentally-friendly fabrics, and durable materials. We are also providing furniture design services for the company houses at Cass Scenic Railroad State Park, bedding and drapery selections for CCC-era cabins at Watoga State Park, and drapery selections for the cabins at Blackwater Falls State Park.

Gat Creek, Cacapon Resort State Park

Client: Gat Creek
Project: Furniture, Bedding, and Window Treatments Approx. Size: 8,261 SF
Location: Cacapon Resort State Park, Berkeley Springs, WV Cost: \$199,929

Gat Creek was asked by the WV State Parks to provide a turn-key solution for the Classic Cabins at Cacapon Resort State Park, and hired Watkins Design Works as their design consultant. The first project comprised two model cabins and services included furniture layouts, furniture and finish selections, window treatments, and bedding. It is anticipated that the remaining Classic Cabins will follow later this year. The second project encompassed the same services for the CCC-era Legacy Cabins at Cacapon. Design for the two types of cabins is in keeping with the periods in which they were built while also showcasing a modern, hospitality-like feel, and providing the WV State Parks with durable furniture and fabrics that will be long-lasting and easy to maintain.

New River Community & Technical College, multiple projects

Client: Community and Technical College System of West Virginia
Project: Furniture and Window Treatments Approx. Size: 52,283 SF
Locations: Raleigh County Campus and Greenbrier County Campus Cost: \$700,000

The first project for NRCTC included furniture for the Allied Health Facility at the Raleigh County Campus in 2015. Typical classroom furniture, computer labs, offices, conference room, and a tiered lecture hall with fixed tables and swivel chairs were all part of this project. Commercial roller shades were specified and bid for the entire new facility. The CTC System purchased furniture for classrooms, student common areas, and boardrooms at both the Raleigh County Campus and Greenbrier County Campus. Watkins Design Works specified all furniture based on a national purchasing contract available to the college.

Jefferson County Circuit Courtroom

Client: ZMM Architects and Engineers
Project: Renovations to St. Margaret's Judicial Annex, Third Floor
Location: 119 North George Street, Charles Town, WV 25414

Size: 7,000 SF
Cost: \$450,000

With West Virginia's 23rd Judicial Circuit adding one Circuit Judge, the Jefferson County Commission undertook a project to renovate one of their Magistrate Courtrooms into a Circuit Courtroom, as well as add Judge's Chambers, a jury room, offices, and other spaces associated with a Circuit Court. The project consisted of both new and existing millwork, and new and existing furniture. New furniture was purchased by the county from a preferred vendor.

West Virginia Department of Commerce

Client: ZMM Architects and Engineers
Project: Furniture Design and Coordination
Location: Capitol Complex, Building 6, Room 525, Charleston, WV 25305

Size: 4,000 SF
Cost: \$105,000

During this project, offices for the former Cabinet Secretary and his staff were located on one-quarter of the 5th floor in State Office Building 6. A primary goal of the renovation was to create a modern, professional first impression for visitors who are interested in starting or expanding a business in West Virginia. Private offices were created using systems furniture, lots of glass to let in natural light, and wood-grain walls and desks. A large conference room and plenty of meeting space and storage space within each office were key features. Furniture was procured from the Statewide SYSFURN Contract.

N3

Client: N3
Project: Tenant Fit-Out
Location: 2001 Union Carbide Drive, Suite 1500, South Charleston, WV 25303

Size: 27,033 SF
Budget: \$2,361,170

N3 is an Atlanta-based private company which opened up an office at the West Virginia Regional Technology Park in South Charleston. Their new tenant space includes primarily systems furniture in an open plan environment, with some private offices and smaller meeting rooms throughout the space. There is also a large staff lunch room and executive suite. Branding is an important component of N3's culture, so their logo and corporate colors are prominent in the design. Furniture was procured through a private bidding process.

West Virginia Army National Guard

Client: Williamson Shriver Architects
Project: Clarksburg Armory / Weston Armory Interior Renovations
Locations: 5 Armory Road, Clarksburg, WV / 40 Armory Road, Weston, WV

Size: 37,200 SF
Cost: \$700,000

The armories in Clarksburg and Weston received finish and ADA upgrades to the shower/locker rooms. Watkins Design Works was responsible for documentation of existing conditions, overall drawing production and finish selections.

Oakwood Terrace Apartments

Client: Kanawha Valley Homes
Architect: Williamson Shriver Architects
Project: Kitchen and Bath Renovations
Location: 872 Westminster Way, Charleston, WV 25314

Size: 73,000 SF
Cost: \$1,555,653

Seventy-two apartments underwent renovation of kitchens and bathrooms in these low-income, HUD-financed multi-family units. More durable finishes were specified and installed, vanities replaced wall-mounted sinks in bathrooms, new tubs and shower surrounds were included, as well as LED lighting, and new kitchen cabinets.

Robinson Grand Performing Arts Center

Client: WYK Associates
Project: Robinson Grand Theater Renovations
Location: 444 West Pike Street, Clarksburg, WV 26301

Size: 45,000 SF
Budget: \$15,000,000

Interior renovations for this Art Deco-era theater include the primary theater space and balconies, lobby, concessions, restrooms, offices, ballroom, bar area, green room and other back-of-house functions. The color palette is reminiscent of the early 1940's and compliments the existing dark red brick on the exterior and existing interior finishes.

WilliamsonShriver**Architects**

Ted A. Shriver

AIA / LEED AP BD+C / REFP
Architect / Principal

Ted Shriver is a registered architect and President of Williamson Shriver Architects. In addition to his role as firm business manager, he is additionally responsible for the office-wide coordination and production of contract documents. He brings to the firm 35 plus years of architectural experience, and his primary responsibilities include assurance that appropriate production and support resources are applied to each project.

Office management, marketing and construction administration on smaller scope projects add to his daily responsibilities. He also oversees the firm's computer system, including evaluation and installation of new technology.

He has extended this computer expertise to an understanding of the utilization and implementation of technology in school facilities and attends the Council of Educational Facility Planners' Technology Conferences. Since 2005, Mr. Shriver has focused on establishing guidelines for our designs on implementing safe schools and monitoring systems.

Mr. Shriver is active in the Association for Learning Environments (ALE) especially in the Southeast Region. In 2003, he was one of the founding members of the West Virginia Chapter and served as their President from 2004-2007. He has also served as the Southeast Director since 2002.

With over twenty eight years of tenure at Williamson Shriver Architects, Mr. Beyer is responsible for the coordination of structural design for all of the firm's projects, and personally designs the structural systems for most projects. He coordinates and integrates his design work with our in-house architectural designs as well as with mechanical and electrical engineering design performed by our consultants. He is also responsible for the production of details and specifications for a project's structural systems and materials.

Mr. Beyer's close involvement with the project architect provides for the smooth integration of the structural system into

the project while maintaining the aesthetics of the architect's design. His availability for immediate consultation is an asset to the design team. Mr. Beyer draws from his years of experience as a structural steel detailer, a structural draftsman, and engineering technician within the Charleston area.

In addition to his structural responsibilities, Mr. Beyer also serves as production coordinator for all project disciplines, ensuring that appropriate staff is in place to assure on-time completion of design work.

Mr. Beyer is an avid whitewater paddler, and currently sits on the WV Whitewater Commission, appointed by Governor Wise in 2005

Gregory I. Martin

AIA/NCARB
Project Architect

Greg Martin received his Masters of Architecture Degree from Virginia Polytechnic Institute and State University in 2008 after graduating from Fairmont State University in 2005. In the fall of 2008, he joined Williamson Shriver Architects as a project manager overseeing small renovation and additions projects. As his experience grew, his responsibilities with the firm increased. In 2013, he officially began the pursuit of architectural licensure and in early 2016 he successfully concluded his Architectural Registration Examination and became licensed to practice architecture in WV.

As Project Architect, he specializes in building design and production / coordination of construction documents for projects of all types and sizes.

Mr Martin's project portfolio with Williamson Shriver Architects includes Poca Elementary/Middle School, Leading Creek Elementary School, the Ronald McDonald House in Charleston, Little Creek Golf Course Clubhouse, the LEED candidate Gilmer County Elementary School in Glenville and Charleston Fire Station No. 3 which reopened to active duty August of 2018.

In addition to his professional career, Mr. Martin is an accomplished craftsman in wood, concrete and other media.

Dana W. Scarberry

AIA Associate
Project Manager

A longtime employee of Williamson Shriver Architects, Mr. Scarberry has spent his adult lifetime in working in the architecture and building design industry, joining Williamson Shriver Architects in 1990. In this time, he has amassed considerable and invaluable knowledge and experience regarding building design, systems, and detailing. He serves as our senior Project Manager, advancing the design prepared by the partners into a complete and coordinated set of constructable documents. As part of this process, he brings his extensive knowledge of building

codes and standards, coordination of consultants providing site, electrical and mechanical systems design, and preparation of building system specifications.

Mr. Scarberry also has considerable experience in roofing design. Over the course of his career he has designed millions of square feet of roofing and roofing replacement. He also serves as Williamson Shriver's in-house coordinator of door hardware and kitchen equipment design.

Steven W. Gibson

AIA Associate

Construction Contract Administrator

Steve Gibson is responsible for contract document administration and field observation during the construction phase of a project. His duties include shop drawing review, attending construction conferences, compiling construction observation reports, and serving as liaison between owner and contractor.

Prior to joining the staff in 1985, Mr. Gibson's experience was primarily in the engineering fields.

He has participated in the design, project management and construction of numerous industrial, commercial, public housing and public works facilities since 1970.

Mr. Gibson has also worked for a large local construction firm as an estimator. This employment allows him to bring a unique knowledge and understanding of the contractors' perspective toward construction projects to the firm.

Amanda Hayslett

Administrative Assistant

Amanda will serve as an administrative assistant for Williamson Shriver Architects. Having worked as a administrative assistant for accountants, engineers and construction companies over the past twenty-five years, she will apply that experience and knowledge to the team. Her project based responsibilities include, but are not limited to, development of contracts / agreements, project manual assembly, specifications, assistance with the bidding process, processing of bonds and insurance, construction cost monitoring, construction phase submittals, applications for payment processing and project closeout documentation.

As construction phase submittals manager, she maintains the electronic submittals log, assuring that action by staff and consultants is taken as expeditiously as possible.

In addition to these project based responsibilities, she also plays an essential primary role in preparation of educational planning documents such as annual updates and ten-year plans for numerous county school systems.

Education:

West Virginia State University, 1986

EXPERIENCE

Watkins Design Works, LLC Jan 2014 - Present
Owner Charleston, WV

Jill started her own interior design and green building consulting business in 2014. As an NCIDQ-certified interior designer with over 25 years of experience, and now as an entrepreneur, Jill brings both knowledge of and a passion for interior design and green building to all her clients.

ZMM Architects and Engineers May 2008 - Dec 2013
Interior Designer/Sustainability Coordinator Charleston, WV

In this dual role, Jill worked alongside project architects in developing comprehensive finish and furniture designs, as well as with all project team members on the firm's LEED projects, including the JITEC facility at Camp Dawson (LEED Gold Certified) and the Wood County Justice Center (LEED Certified). She selected colors for many of the firm's school projects, and was integrally involved with their military and higher education clients.

Cubellis Dec 2005 - May 2008
Senior Interior Designer Boston, MA

Jill was responsible for design of the firm's Boston headquarters, which received LEED-CI Gold Certification in August of 2009. She was also a key team member in the design of Gillette's global headquarters renovation and subsequent tenant redistribution in their former lease space.

- Wolf Maison LimitedFeb 2004 – Aug 2005
Interior DesignerCleveland, OH
As interior designer for this architectural start-up, Jill expanded her experience into dental office design and high-end residential projects, along with additional corporate work. She also provided LEED assistance to Cleveland State University in the form of drawing and specification reviews and recommendations for the new Recreation Center; the building is LEED Silver Certified.
- Doty & Miller ArchitectsMay 2003 – Feb 2004
Interior DesignerCleveland, OH
For one of Cleveland's greenest architectural firms, Jill provided sustainable interior design for a variety of project types, including healthcare, public projects and nonprofit organizations.
- AECOM (formerly URS Corporation).....Nov 1999 – Feb 2003
Senior Interior DesignerCleveland, OH
Jill participated among teams of interior designers, architects and engineers to work on secondary schools, higher education, and public projects. She served an integral role on the design team for the Nathaniel R. Jones Federal Building and U.S. Courthouse in Youngstown, Ohio. This was the first courthouse in the U.S. and the first building in Ohio to become LEED Certified.
- KA, Inc. ArchitectureApr 1998 – Nov 1999
Interior DesignerCleveland, OH
Jill went to KA after their purchase of Triad Design in 1998. As part of the Corporate Studio, she gained experience in the design of corporate headquarters, but also assisted architects with malls and big-box retail store design and documentation.
- Triad Design Interiors.....Aug 1996 – Apr 1998
Interior DesignerCleveland, OH
As a designer with this small interior design firm, Jill was involved in many different project types, including corporate offices, restaurants, and private suites for the new Cleveland Browns football stadium.
- Koster & Associates Architects.....Mar 1995 – Aug 1996
Interior DesignerCleveland, OH
Koster & Associates specialized in library design throughout the Midwest. Jill was responsible for interior finishes, furniture design and custom millwork design and documentation.
- Capitol Business Interiors.....May 1993 – Feb 1995
Interior Designer.....Charleston, WV
After working at CBI in the summer months while in college, Jill worked as a full-time designer supporting the salespeople in the firm's many public and private projects, including Union Carbide's Building 6000 and the initial renovation of One Station Place.

REPRESENTATIVE PROJECTS

West Virginia Army National Guard

Joint Interagency Training and Education Center
1001 Army Road, Kingwood, WV 26537
Architect: ZMM Architects & Engineers

As a joint venture between ZMM and AECOM, the *Joint Interagency Training and Education Center* at Camp Dawson was designed to provide a 24/7 operations center and expanded billeting facility. Jill was responsible for interior design of the Billeting addition, including the main lobby, Liberty Lounge, signage/wayfinding, millwork, and billet rooms; coordination of finishes with the AECOM team; and was Co-LEED Administrator. She played an integral role in achieving SSc8 Light Pollution Reduction as the main author of an appeal to the USGBC. The project is LEED Gold Certified.

Jackson County Armed Forces Reserve Center
8832 Point Pleasant Road, Millwood, WV 25262
Architect: ZMM Architects & Engineers

The *Jackson County Armed Forces Reserve Center* is designed to house several units, with an expanded drill hall that is used for various community events. Jill worked closely with the project architect to develop a comprehensive interior color palette that works seamlessly with the exterior materials, as well as interior details, lighting design, and LEED coordination for the project. She designed enhanced acoustical treatments for the drill hall that expand its functionality as a large group space. The AFRC is designed to meet LEED Silver certification.

Morgantown Readiness Center
Morgantown Municipal Airport, Morgantown, WV 26505
Architect: ZMM Architects & Engineers

As home to the 249th Army Band and other units, the *Morgantown Readiness Center* features an auditorium, practice rooms, offices, classrooms and drill hall. Jill was responsible for interior design of all areas, coordination with the acoustic consultant, and LEED coordination. The project is designed to meet LEED Silver certification.

Logan-Mingo Readiness Center
James A. "Buck" Harless Industrial Park, Holden, WV 25625
Architect: ZMM Architects & Engineers

Housing the military police and other units in the heart of coal country, the Logan-Mingo Readiness Center is the most recent readiness center completed by the WVARNG. Jill was responsible for all aspects of the interiors for public areas, offices, classrooms, and drill hall. The interior design includes a darkly painted "coal seam" that is seen throughout the public spaces and combined with bright accent colors. She was also responsible for LEED coordination; the project is designed to meet LEED Silver certification.

Wood County Commission

Wood County Justice Center
401 Second Street, Parkersburg, WV 26101
Architect: ZMM Architects & Engineers

The *Wood County Justice Center* in Parkersburg is a culmination of the Sheriff's Department, Magistrate Court and 12-hour holding center moving from three separate buildings into one existing building. Jill was responsible for programming, space planning, interior design, millwork design, lighting design, furniture design and LEED Coordination. The project is LEED Certified.

West Virginia Housing Development Fund

5710 MacCorkle Avenue, Charleston, WV 25304
Architect: ZMM Architects & Engineers

For the WVHDF's new office building in Kanawha City, Jill developed a clean, modern color palette and furniture design to match. She was also responsible for lighting and millwork design, and many sustainable features of the building.

Kanawha County Public Library

Elk Valley Branch Library
313 The Crossings Mall Road, Elkview, WV 25071
Architect: ZMM Architects & Engineers

The new *Elk Valley Branch Library* in Elkview is providing a much-needed modernized and accessible space for this small branch. The library moved into an existing building and Jill was responsible for all aspects of the interior, including space planning, finish selections, furniture design, and construction administration.

Christ Church United Methodist

1221 Quarrier Street, Charleston, WV 25301
Architect: ZMM Architects & Engineers

This historic church near Charleston's East End underwent an extensive renovation of its educational wing, choir area, teen area, and gymnasium. Jill was responsible for finish selections, furniture design, coordination with each committee, and assisted with construction administration.

Procter & Gamble

Gillette World Shaving Headquarters
Gillette Park, Boston, MA 02127
Architect: Cubellis

Not long after Procter & Gamble purchased Gillette in 2005, plans to convert the original Boston razor factory into Class A office space with expanded amenities and strict P&G branding commenced. Jill was a key team member consisting of architects and other interior designers involved in master planning, programming, space planning, design, and contract documents. The project was designed to meet Boston Green Building Standards, similar to LEED Silver.

Owner:
Teays River Station LLC
Brian Prim
Managing Partner
Prim Law Firm, PLLC
(304) 201-2425

Services provided in-house:
Architectural design
Structural design
Interior design

Services provided by consultants:
MEP Design - Harper Engineering

Year completed: 2015

Other data:
Size: 6,500 SF
Cost: Withheld by Owner

The design concept for this multi-building development was to draw design features from the farmhouse vernacular and traditions of the historically agrarian Teays Valley, West Virginia community in which it resides.

Exterior features include a partial stone veneer and a striking complementary green wood veneer. These are set off by the traditional grey-silver metal roofing often found on farm buildings.

This initial building is a two

story office structure housing the development owner's law firm on the second floor with a tenant cardiac medical office on the ground level. Building two of this development is currently in design, and will feature a similarly detailed but larger office building placed perpendicularly on the site.

Williamson Shriver Architects was assisted by team members Triad Engineering (site / civil), Harper Engineering (MEP) and Laura Davis Interiors on this project.

South Charleston Fire Station No. 1

Owner:

City Council of the
City of South Charleston
The Honorable Frank Mullens,
Mayor
(304) 744-5300

Services provided in-house:

Architectural design
Structural design
Interior design

Services provided by consultants:

Site/Civil Design - Terradon Corp.
MEP Design - Harper Engineering

Construction commence: 2015

Year completed: 2016

Other data:

Size:	10,119 SF
Construction Cost:	\$2.8 Million
Cost/SF	\$276.70 / SF

Description of Project:

This project is a replacement fire station facility for the City of South Charleston. For this station, the city requested a design in keeping with the high-tech chemical manufacturing facilities located nearby.

The design of this building includes three drive-thru apparatus bays, plus storage and maintenance spaces for fire fighting operations. This area also includes a multi-story training space for learning vertical movement and

rescue.

The living quarters includes six sleeping berths, toilet / showers for male and female firefighters, shift commander's quarters and office, captain's quarters and office, and spaces for kitchen, dining, living, meeting/computer room, and laundry.

The building exterior features a sweeping curved metal roof, tri-color brick, and both smooth and corrugated metal wall panels.

City of Charleston Fire Station No. 3

Owner:
City of Charleston
David Molgaard, City Manager
(304) 348-8014

Services provided in-house:
Architectural design
Structural design
Interior design

Services provided by consultants:
Site/Civil Design - Terradon Corp.
MEP Design - Harper Engineering

Construction commence: 2017
Year completed: 2018

Other data:
Size: 6,384 SF
Construction Cost: \$1.097 Mil.
Cost/SF: \$171.84 / SF

Description of Project:
This project is a new fire station facility for the City of Charleston to replace a 1928 structure that the city demolished in 2016.

The existing site is located in a mixed residential and commercial area located near Route 119. Using the existing limited site, the design required the building to be multiple levels to facilitate the needs of the station. The main floor includes a general office

with an ADA toilet and shower along with a two stall apparatus bay to house the new fire truck and an EMS vehicle. The second floor provides five separate sleeping quarters for the crew, two individual toilet / showers, laundry, and a full size kitchen and living room to accommodate three shifts. The steeply sloping site allowed the city to build a lower level to be used a general storage and workout space for the fire fighters.

First Floor

Second Floor

South Charleston Area Development Corporation

Regional Inter- Governmental Council

Owner:
South Charleston Area Develop-
ment Corporation
Steve Weir, Executive Director

Services provided in-house:
Architectural design
Structural design

Year completed: 1999

Other data:
Size: 7,500 SF
Construction Cost: \$1 million

Description of Project:
This project was a pair of twin buildings sharing the same site located across the street from City Hall in downtown South Charleston, WV. Each building has its own unique identity expressed through separate front entrances

on different city streets.

Each building contains offices, conference rooms, and other administrative support spaces. A private outdoor courtyard meanders between the two buildings.

Renovations to South Charleston City Hall

Owner:
City of South Charleston, WV
The Honorable Frank Mullens,
Mayor
(304) 744-5301

Year completed: 2000

Other data:
Size: 1,200 SF
Construction Cost: \$600,000

Description of Project:

This project included ADA renovations and additions, exterior masonry renovations, and other minor interior renovations to the existing historic city hall in South Charleston, WV.

The existing building prior to this project was not ADA compliant, with no elevator and no direct accessible path to enter the building. This design resolved these issues through the construction of a new ADA compliant entrance on the left hand side of the building which included a new ramp entrance and an elevator.

A new main entrance vestibule was constructed along the D Street facade for energy conservation purposes. Also, masonry re-pointing and other brick facade repairs were undertaken to ensure this building's viability for many years to come.

Ronald McDonald House

Charleston, WV

Owner:
 Ronald McDonald House Charities
 of Southern West Virginia
 Dewayne Dickens
 Executive Director
 304-346-0279

Services provided by Consultants:
 MEP Design - Harper Engineering

Construction commenced: 2015
 Year completed: 2016

Other data:

Size: 18,900 SF
 Cost: \$3.5 million

Williamson Shriver Architects was retained in 2010 to provide planning services for a new Ronald McDonald House to be located near CAMC Women's and Childrens Hospital in Charleston, WV. After several years of planning and fund raising, the new facility was completed in 2016.

As Ronald McDonald Houses offer free housing to families of hospitalized children, a primary goal is to offer guests a feeling of emotional comfort and security in a home-like atmosphere. This was accomplished in part through breaking the building into three distinct zones: public spaces, guest suites, and administrative offices. There are 14 guest suites divided amongst two floors and many public areas including a communal kitchen, dining room, food pantry, laundry room, kids play room, a den, great room, and an outdoor patio. These spaces are intended to give each resident the comfort of home while providing opportunities for interaction between guests and

staff. A welcome station is located in the entry lobby and will be staffed 24 hours a day. The main entrance includes a secure vestibule, which allows staff to maintain visual control of the building entry point during all hours.

The design intent of the exterior was to create an inviting and intriguing facade with the use of vibrant colors, tall vertical masses, and large areas of fenestration.

By accomplishing these considerations in the design, the site now has an eye catching building that is unique to the area.

LaQuinta Inn & Suites Renovations

Elkview, WV

Owner:
Plaza Management, LLC

Services provided in-house:
Architectural design
Structural design

Year completed: 2014

Services provided by Owner:
Interior Design - Supreme Hospitality - Atlanta, GA

This project was undertaken as a conversion of an existing Country Inn and Suites property. The owner sought Williamson Shriver Architect's assistance in designing substantial renovations to meet current LaQuinta brand design standards.

Exterior renovations included revisions to the roof form, new EIFS finish system, and renovations to the main entrance canopy. On the interior, renovations centered on a complete updating of the first floor public spaces including the lobby, meeting rooms, and fitness center.

West Virginia State Parks, Cabins at Pipestem and Twin Falls State Parks

Client: West Virginia Division of Natural Resources
 Contact: Paul Redford, District Administrator, Lodge and Resort District
 Parks and Recreation Section, 324 4th Avenue, South Charleston, WV 25303
 304.558.2764, paul.a.redford@wv.gov

Project: Cabin interiors, furniture, and window treatments Approx. Size: 31,425 SF
 Locations: Pipestem Resort State Park and Twin Falls Resort State Park FFE Cost: \$687,902

Watkins Design Works provided interior design services for the 1960's-era cabins designed by The Architects Collaborative out of Boston and Irving Bowman & Associates of Charleston. The original cabins will receive new kitchens, bathrooms with floor and wall tile, a variety of accent paints, modern window shades, and new furniture. Artwork was specified from West Virginia artists and framers. The furniture itself is all made in America, including Berkeley Springs, WV. The fabrics are also made in America, are extremely durable, with good indoor air quality and recycled content. Watkins Design Works made some modifications to some of Gat Creek's wood furniture for end tables and coffee tables.

West Virginia State Parks, Houses at Cass Scenic Railroad State Park

Client: West Virginia Division of Natural Resources
Contact: Matt Yeager, District Administrator
Parks and Recreation Section, 324 4th Avenue, South Charleston, WV 25303
304.558.2764, matt.j.yeager@wv.gov

Project: Furniture, bedding, and window treatments for the company houses
Location: Cass Scenic Railroad State Park, 12363 Cass Road, Cass, WV 24927

The state parks were partnering with WV Correctional Industries to build furniture for the houses at Cass but wanted to deviate from their standard product offering to something with more of a railroad theme. Watkins Design Works provided design sketches which modified their standard chair by including an "X" design detail which mimics the porch railings and railroad crossing signs. Commercial grade fabric was also specified with an "X" pattern and wide horizontal "train tracks" as part of the pattern. The color red was chosen as a reflection of the red cabooses. Custom coffee tables and end tables were designed based on this "X" concept and combine metal with wood. For dining rooms, design of original tables is to be copied, and chairs will be refinished and reused from one of the other parks.

Gat Creek, Cabins at Cacapon Resort State Park

Client: Caperton Furniture Works / Gat Creek
Contact: Gat Caperton, President & CEO
5270 Valley Road, Berkeley Springs, WV 25411
304.258.2343 x 115, gat@gatcreek.com

Project: Furniture, bedding, and window treatments for Classic and Legacy Cabins Size: 8,261 SF
Location: Cacapon Resort State Park, Berkeley Springs, WV 25411 Cost: \$199,929

Gat Creek was asked by the WV State Parks to provide a turn-key solution for the Classic Cabins at Cacapon Resort State Park, and hired Watkins Design Works as their design consultant. The first project comprised two model cabins and services included furniture layouts, furniture and finish selections, window treatments, and bedding. It is anticipated that the remaining Classic Cabins will follow later this year.

Since the Classic Cabins have pine walls and ceilings as well as wood flooring, wood finishes for the furniture are gray and green, darker in the living / dining room and lighter in the bedrooms. Gray fabrics compliment the warm walls, and local CCC-era artwork add to the charm.

The second project encompassed the same services for the CCC-era Legacy Cabins at Cacapon. The design for these is in keeping with the period...craftsman-style tables and chairs, hammered metal lamps, a cherry wood finish, and an arts & crafts style upholstery pattern for the lounge chairs and sofa. Modern touches include bright blue bedding fabric and pale blue-green wood finish on chests of drawers. Watkins Design Works also designed a modification to one of Gat Creek's pieces to fit the unique size and layout in some of the cabins.

Corporate Office

N3, Tenant Fit-Out for the West Virginia Office

Client: N3

Contact: Ken Boggs, Vice President of Operations

2001 Union Carbide Drive, Suite 1500, South Charleston, WV 25303

202.340.4237, kenneth.boggs@n3results.com

Project: Tenant Fit-Out

Size: 27,033 SF

Location: 2001 Union Carbide Drive, Suite 1500, South Charleston, WV 25303

Cost: \$2,361,170

N3, an Atlanta-based private company, recently opened an office at the West Virginia Regional Technology Park in South Charleston. Their new tenant space includes mostly systems furniture in an open plan environment, with some private offices and smaller meeting rooms throughout the space. There is also a large staff lunch room and executive suite. Branding is an important component of N3's culture, so their logo and corporate colors are prominent in the design. The project delivery method was design-build, but furniture was procured through a private bidding process. Watkins Design Works provided programming, space planning, interior design services, and worked closely with BBL Carlton throughout construction. The project was completed in February 2018, Phase 2 was completed at the end of May 2018, and the firm already has plans for additional expansion.

Robinson Grand Performing Arts Center

Client: WYK Associates

Contact: James Swiger, President

1038 Washington Avenue, Clarksburg, WV, 26301

304.624.6326, james@wykarchitects.com

Project: Renovations to the Robinson Grand Performing Arts Center

Location: 444 West Pike Street, Clarksburg, WV, 26301

Size: 45,000 SF

Cost: \$15,000,000

The City of Clarksburg purchased this Art Deco theater, along with two adjacent properties, and focused on bringing it back to life. Watkins Design Works provided color and material selections for the main theater and balcony, lobby, concessions, offices, mezzanine/bar area, ballroom/multi-purpose space, dressing rooms, and other back-of-house areas.

Inspiration for the colors and patterns came from this Art Deco print.

Jefferson County Commission, 23rd Judicial Circuit Courtroom

Client: ZMM Architects and Engineers
Contact: Adam Krason, Principal
222 Lee Street West, Charleston, WV 25302, 304.342.0159, ark@zmm.com

Project: Third Floor Renovation, St. Margaret's Judicial Annex
Location: 119 North George Street, Charles Town, WV 25414
Size: 7,000 SF
Cost: \$450,000

With West Virginia's 23rd Judicial Circuit adding one Circuit Judge, the Jefferson County Commission undertook a project to renovate one of their Magistrate Courtrooms into a Circuit Courtroom, as well as add Judge's Chambers, a jury room, offices, and other spaces associated with the Circuit Court. The project consisted of both new and existing millwork, and new and existing furniture. New furniture was purchased by the county from a preferred vendor. Watkins Design Works provided programming, space planning, interior design, and furniture design services.

New seating was selected in a period style, and which would work with existing attorney's tables. Carpet and finishes were chosen to blend with existing casework and work well with the angles in the room.

Existing features of the former Magistrate Courtroom include the judge's bench, adjacent casework, and the ceiling.

The expanded jury box included a new low wall to match existing millwork, and new pedestal base chairs in the period style.

Judge's Chambers.

WV Department of Commerce, Office of the Former Cabinet Secretary

Client: ZMM Architects and Engineers

Contact: Adam Krason, Principal

222 Lee Street West, Charleston, WV 25302, 304.342.0159, ark@zmm.com

Project: Furniture design for the WV Department of Commerce

Size: 4,000 SF

Location: Capitol Complex, Building 6, Room 525, Charleston, WV 25305

Cost: \$105,000

Offices for the former Cabinet Secretary and his staff were located on one-quarter of the 5th floor in State Office Building 6. A primary goal of the renovation was to create a modern, professional first impression for visitors who are interested in starting or expanding a business in West Virginia. Private offices were created using systems furniture, lots of glass to let in natural light, and wood-grain walls and desks. A large conference room and plenty of meeting space and storage within each office are key features.

Reception Area

Even interior offices have access to daylight (above) / Former Cabinet Secretary's office (below)

Terms & Conditions

WilliamsonShriver**Architects**

ADDITIONAL TERMS AND CONDITIONS
(Architectural and Engineering Contracts Only)

1. PLAN AND DRAWING DISTRIBUTION: All plans and drawings must be completed and available for distribution at least five business days prior to a scheduled pre-bid meeting for the construction or other work related to the plans and drawings.

2. PROJECT ADDENDA REQUIREMENTS: The Architect/Engineer and/or Agency shall be required to abide by the following schedule in issuing construction project addenda. The Architect/Engineer shall prepare any addendum materials for which it is responsible, and a list of all vendors that have obtained drawings and specifications for the project. The Architect/Engineer shall then send a copy of the addendum materials and the list of vendors to the State Agency for which the contract is issued to allow the Agency to make any necessary modifications. The addendum and list shall then be forwarded to the Property and Procurement Office buyer by the Agency section. The Property and Procurement Office buyer shall send the addendum to all interested vendors and, if necessary, extend the bid opening date. Any addendum should be received by the Property and Procurement Office at least fourteen (14) days prior to the bid opening date.

3. PRE-BID MEETING RESPONSIBILITIES: The Architect/Engineer shall be available to attend any pre-bid meeting for the construction or other work resulting from the plans, drawings, or specifications prepared by the Architect/Engineer.

4. AIA DOCUMENTS: All construction contracts that will be completed in conjunction with architectural services procured under Chapter 5G of the W. Va. Code will be governed by the AIA A101-2007 and A201-2007 or the A107-2007 documents, as amended by the Supplementary Conditions for the State of West Virginia, in addition to the terms and conditions contained herein. The terms and conditions of this document shall prevail over anything contained in the AIA Documents or the Supplementary Conditions.

4A. PROHIBITION AGAINST GENERAL CONDITIONS: Notwithstanding anything contained in the AIA Documents or the Supplementary Conditions, the State of West Virginia will not pay for general conditions, or winter conditions, or any other condition representing a delay in the contract. The Vendor is expected to mitigate delay costs to the greatest extent possible and any costs associated with Delays must be specifically and concretely identified. The state will not consider an average daily rate multiplied by the number of days extended to be an acceptable charge.

5. GREEN BUILDINGS MINIMUM ENERGY STANDARDS: In accordance with W. Va. Code § 22-29-4, all new building construction projects of public agencies that have not entered the schematic design phase prior to July 1, 2012, or any building construction project receiving state grant funds and appropriations, including public schools, that have not entered the schematic design phase prior to July 1, 2012, shall be designed and constructed complying with the ICC International Energy Conservation Code, adopted by the State Fire Commission, and the ANSI/ASHRAE/IESNA Standard 90.1-2007: Provided, That if any construction project has a commitment of federal funds to pay for a portion of such project, this provision shall only apply to the extent such standards are consistent with the federal standards.

DESIGNATED CONTACT: Vendor appoints the individual identified in this Section as the Contract Administrator and the initial point of contact for matters relating to this Contract.

WV Purchasing Affidavit

WilliamsonShriver**Architects**

STATE OF WEST VIRGINIA
Purchasing Division

PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.
